FOREWORD

Disaster management is a process or strategy that is implemented when any type of catastrophic event takes place. A truly comprehensive disaster management action plan will encompass a wide range of possibilities that can easily be adopted in the event of one disaster that sets off a chain reaction of other types of disasters in its wake.

Paschim Medinipur district in the past has experienced disasters like flood, drought, cyclone etc. In the year 2013 the district experienced five successive spells of flood due to heavy rainfall in upper catchment areas and huge discharge from dams. We have also faced flood during the year 2015. A havoc flood in 2017 caused enormous loss to human lives and properties. We can minimize the suffering of the affected people by providing assistance to them in case of emergency. Preparation of Disaster Management Plan-2020 is viewed as a part of preparedness with a view to take appropriate action to save human lives and properties in the face of disaster.

The Disaster Management Action Plan-2020 is a co-ordinated effort of Disaster Management Section of Paschim Medinipur Collectorate and other line departments. These departments actively engage themselves during the period of disasters like flood, cyclone etc. The action plan and contingency plan of these departments have been incorporated in this Plan.

I hope that this plan will be immensely helpful to the Government officers of Paschim Medinipur and will be an important source of information and document in the event of disasters. This plan will also prove to be helpful in serving the purpose of saving affected people and mitigating their sufferings with the efforts and dedication of all the persons associated with Disaster Management.

Dated: 01.03.2020

CHAPTER - 1

1. Introduction

The District Disaster Management Plan (DDMP) aims to make the District Disaster resilient and reduce loss of lives, infrastructure and economical assets during calamities.

The DDMP provides a framework to deal with all phases of disaster management cycle -prevention, mitigation, response and recovery—and lays down duties and also works simultaneously with various government departments at all levels such as Sub-Division, Blocks and Gram Panchayat level.

It identifies 18 broad activities to be served as a ready reckoner. These include early warning, maps, satellite inputs, information dissemination, evacuation of people, livestock's and animals, medical care, drinking water, essential supplies like food, communication, power, fuel, transportation, disposal of animal carcasses, relief employment, data collection and management.

The most important part of the plan is the horizontal and vertical matrices that we have worked out which clearly states who has to do what right from Panchayat, Block, Sub-Division or local body to district level.

The DDMP also identifies short, medium and long term measures to deal with disasters to be completed within five, 10 and 15 years respectively. Besides humans it also suggests ways to protect animals. For instance, it stressed that, “agencies specializing in animal care should provide necessary advisory and support for the care and protection of animals”.

In Heat wave conditions, animal and livestock owners must feed adequately with appropriate feed to avoid animal deaths. They must stock suitable feed or forage before Heat wave to feed the livestock. They must avoid exposure of animals to extreme heat
The plan also focuses on human-induced disasters.

The human-induced category includes CBRN (chemical, biological, radiological and nuclear) disasters. Besides, with the natural factors discussed earlier, various human induced activities are also responsible for accelerated impact and increase in frequency of disasters in the district. The DDMP covers disaster management cycle for all types of hazards faced in District, both natural and human-induced. Its mitigation measures and at end the Relief and rehabilitation measures.

1.1 Changing Context of Disaster Management and Enactment of DM Act in India and West Bengal

A profound change in governmental disaster management has occurred during the last decades. Gone are the days of “hunkering down” and riding out the hazard event with a command and control mentality that only focused on clean-up and the rescue of survivors. In its place is an emphasis on the reduction of loss of life and property through mitigation, preparedness, response, and recovery.

The Government of India, in recognition of the importance of Disaster Management (DM) as a national priority, on 23 December 2005 took a defining step by enacting the Disaster Management Act. This is a unique legislation which provides for requisite institutional mechanism for drawing up and monitoring the implementation of the disaster management plans, ensuring measures by various wings of the Government for prevention and mitigating effects of disaster and for undertaking a holistic, coordinate and prompt response to any disaster situation.

The state of West Bengal has already adopted National Disaster Management Act, 2005. Chapter IV of DM Act, 2005 mandates every district in the country to constitute a District Disaster Management Authorities. Articles 31 of DM Act, section of the DM Act, 2005 provides that “there shall be a plan for disaster management for every district of the state. The district plan shall be prepared by the District Authority, after consultation with the local authorities, covering HRVA measures to be taken for prevention with the local authorities, covering HRVA measures to be taken for prevention and mitigation of disaster, capacity building and preparedness measures and response plan. The response plan includes allocation of responsibilities to the depth at local to district level; prompt response and relief, procurement of essential resources; establishment of communication link, and public awareness”. Subsection of Article 31 says that the district plan shall be received and update annually.

1.2. Aims and Objectives of the DDMP

Aims:

The District Disaster Management Plan (DDMP) aims at identifying the disasters and threats that are prevalent in the district, and at the same time addressing the processes that would be involved in addressing the disasters in the district. It is a consolidated guidelines and plans of the district disaster management department in collaboration with the line department in addressing disaster situations.

Meaning of Disaster Management: “Disaster Management” means a continuous and integrated process of planning, organizing, coordinating and implementing measures which are necessary or expedient for-

- Prevention of danger or threat of any disaster;
- Mitigation or reduction of risk of any disaster or its severity or consequences;
- Capacity building;
- Preparedness to deal with any disaster;
- Prompt response to any threatening disaster situation or disaster;
- Assessing the severity or magnitude of effects of any disaster;
- Evacuation, rescue and relief;
- Rehabilitation and reconstruction.

The District Disaster Management Plan (DDMP) is a consolidated format of the plans and actions of the various government departments in the district and the roles and responsibilities they would take up in the time of disaster.

Objectives:

The major objective of the disaster management plan is to minimize the impact of any disaster and increase the capacity of the administration to have coordinate effort to reduce the impact of any disaster and minimize the human and capital loss.

- To find out the type of risks the district is vulnerable to.
- To measure the vulnerability of life and livelihood and infrastructures to different type of risks.
- To develop a multihazard preparedness plan for effective management of different type of disasters the district is vulnerable to.
- Institutionalization of the disaster management in district administration
- To develop strategy for mass awareness on do's and don'ts on different type of disasters.
- To find out the resources of the district.
- To create a cadre of skilled volunteers to respond to different type of disasters.
- To make inter-departmental coordination more effective at the time of emergency.
- Encouraging and empowering the local community to know the disaster management
- Regular update of the resource available in and around the district.
- To strengthen the capacities and resilience of vulnerable community with special emphasis on empowerment of women and establish community level systems for pre, during and post disaster interventions through awareness generation and capacity building.

2. District Profile

		River Lift Irrigation	367
		Area irrigated	18719 Hec.

2.2 Location and boundaries:

Paschim Medinipur, located in the southern part of West Bengal, has been carved from the erstwhile Medinipur district, the then largest district of India, and came into existence in the present form from 1st January 2002. Subsequently the district has been bifurcated on 04.04.2017 creating a new District Jhargram. Paschim Medinipur is bounded by Bankura district from the northern side and Purba Medinipur district from the south-eastern side the southern and western boundary of the district is merged with Jhargram District.

The present population of the district is 47 lakh (approx.) with 18.9%SC and 11.55% ST population. Geographical area of the district is 3307.76 Sq. Km.

Multifarious Regional Diversity: Paschim Medinipur district represents regional diversity in terms of physiographic, agro-climatic characteristics, economic development, social composition etc. It has low basins in the south-east and east. It has drought-affected dry areas in the west but highly wet flood-affected in the east. Dense dry deciduous forest in the west is replaced by semi-aquatic vegetations of marsh lands in the east. It has barren lateritic, non-arable lands in the west and north-west, which gradually changes with highly productive alluvial soil areas in the central and eastern part of the district. It is the abode of tribes and primitive tribes in the western blocks while most of the other areas are inhabited by all castes of the mass society. It represents cultural diversity across blocks.

2.3 Topography: The area of the district is 3307.76 Sq.Km. The general appearance of the district is that of a large and well-cultivated plain, but towards the north and west gently undulations appear, with ridges covered by a thick growth of sal trees and other scrub jungle, while the intervening depression produces rich crops of rice. Partly from the poor fertility of the soil, and also from the ruthless way forest have been cut down in past, large forest trees are scares, but still in the neighborhood of some of the villages, a few fine tamarind, sal and mahua trees still do remain.

2.4 Natural Division: Broadly speaking, there are two natural divisions of the district. The metalled road from Raniganj and Bankura, which traverses the district from north to south, passing through the station of Medinipur and onwards to Balasore and Cuttack, may be generally taken as a dividing line between them. To the east of this road, the soil is purely alluvial, the country is flat, and the land is fertile and fully cultivable. To the west, the country is undulating, the high lands of Central India here terminating in long rolling waves of laterite rock. The characteristic formation of the district is laterite in the north and west, but in the south and the east it gradually gives way to the ordinary alluvium of the Gangetic delta.

The alluvial portion may be subdivided into two divisions; first, there is a strip of purely deltaic country bordering Hooghly, intersected by numerous river and water-courses, which are subject to tidal influence. These water-streams are usually connected with one another, thereby rendering it to travel by water. This low-lying tract extends for about 20 miles inland from the Rupnarayan and Hooghly. The alluvial deposits seem to cover the final swells of the laterite formation. None of this formation as yet appeared on the surface, but the watersheds between the streams are distinct, and the general elevation of the country is higher. The second division consists of the alluvial tract constituting the remainder of the eastern half of the district. This is monotonous rice plain intersected by numerous waterways and tidal creeks, which are lined with embankments to protect the fields from flood water. Much of the area is waterlogged, and this is particularly the case with the tract bounded by the Kasai River on the south and the Silai River on the north. This latter tract is a low laying depression formed of the combined details of the Kasai and Silai rivers and intersected by numerous Khals. The river beds

have been raised by the constant deposit of silt above the level of the surrounding country; the latter has to be protected from inundation by a complicated system of embankments. Many of these unfortunately obstruct the natural drainage of the country with the result that the soil being deprived of its increment of deposit is permanently depressed, while the waterways have become choked with silt and the land below them is waterlogged.

2.5 River System: The river system of Paschim Medinipur district consists of the Rupnarayan, the Kansai and the Subarnarekha which enters this district from Jhargram and passes into the Balasore district, where it falls into the Bay of Bengal. The principal tributary of the Rupnarayan is the Silai or Silabati. This river enters this district from the Bankura district on the north, and follows a tortuous course. It runs fast in an easterly direction through the north of the Medinipur (Sadar) Sub-division, and then turns to the south east and south through the Ghatal Sub-division. Near Narajole it takes a sharp turn to the north, and eventually it falls into the Rupnarayan at Bhandar, 4 miles below Ghatal. The Silai is navigable throughout the year for a short distance in its lower reaches, which are within tidal influence. It is fed by two small streams from Bankura district on the north, the Purandar and Gopa, and by the Chandur and Kubai from this district which rise in the north-west of the district and flows east till it empties itself into the Silai near Narajole.

The Kasai enters the district in the north-west from Jhargram. It flows an exceedingly tortuous course, running first south-west and then eastwards, passed the town of Medinipur, which is situated on its north bank. Below Medinipur the channel contracts rapidly, till at Kapas-tikri, 13 miles lower down, it bifurcates, one small branch going north and eventually into the Rupnarayan, while the main channel runs south-east. The Subarnarekha is the only other river of Paschim Midnapore requiring notice. It enters the district on the north-west from Jhargram district and pass through the south-west of Kharagpur sub-division. To the South of Dantan it enters Balasore district and finally falls into the Bay of Bengal. The Subarnarekha has a rapid stream with a sandy bed, and its banks are generally high and well defined. In seasons of high flood the river overflows its left bank about 4 miles above the point where it leaves Paschim Medinipur district to enter Balasore district.

3. Past disaster Scenario in the district

3.1 Past disasters in the district and loss thereof

1. “A Severe Cyclonic Storm BULBUL” hit an extensive area of this district in November; 2019. Heavy rainfall also affected some areas of this District especially in Kharagpur and Medinipur Sadar Sub-Division.
2. “A Cyclonic Storm FANI” hit an extensive area of this district in May, 2019. Heavy rainfall also affected some areas of this District especially in Kharagpur, Medinipur Sadar and Ghatal Sub-Division.
3. “AILA” also hit an extensive area of this district in May; 2009. Heavy rainfall added with release of water from the dams during 1st quarter of September, 2009 affected some areas of this district especially in Ghatal Sub-Division.
4. In the year 2007 severe flood occurred in four successive rounds causing large scale devastating damage of dwelling houses, standing crops and public properties. The death toll was 97. Army and Air Force authority had to be deployed for rescue and relief of the marooned people.
5. The District had to face severe flood in the year 2005 in which more than 5 lakh people were affected.
6. The district had to face a severe drought in 2002 and it affected major blocks of the district.
7. The district had to face a flood in 1999. Total 56131 numbers of houses were damaged and 45 lakhs (approx.) population was affected.
8. The district had to face a drought in 1998 where crop damage had been more than fifty percent.
9. A severe cyclone with a tornado-like effect hit 3 blocks of this district on 24.03.1998 at around 2.00 to 3.00 P.M. The number of people affected by that tornado was around 26400. The number of affected mouzas was 18 with the total area affected being 3854 hectares.
10. A devastating flood occurred in September 1978 September. A huge number of persons and cattle died. A large number of persons had to stay in the flood shelter; many of them had to take shelter in big trees. Government NGO's and many philanthropic organizations rushed and rescued the unfortunate flood victims.

3.2 Drought & Cyclone Susceptibility:

The experiences of drought and flood are common in the district. The flood prone area is about 142647 ha. (Ghatal & part of Kharagpur sub-divisions). A major part of this district is also prone to drought. Ghatal and the Southern parts of Kharagpur sub-divisions are affected by water logging during the rainy season. As a result, there is frequent loss of crop. Sabang, Pingla, Dantan-I and Narayangarh block in Kharagpur sub-division often suffer from such losses. Drought affects the population here frequently and causes damage to the limited agriculture in the area, affecting food security of the people living here. Though the district does not have a coastline, it is affected frequently by the cyclones during the months of October and November and untimely rains during April and May.

4. Precipitation & temperature:

Normal rainfall in the district is around 1400 – 1500 mm. However, for the last few years, it has been highly erratic in nature.

Average temperature of the district varies widely across seasons, varying between maximum of 40.3 degree Celsius and minimum 10.3 degree Celsius in 2014. The climate is characterized by hot summer, cold winter, abundant rainfall and humidity. Rainfall fluctuates widely over years and concentrates over a few months of a year under monsoon.

Temperature (Degree Celsius)		Rainfall Normal (m.m.)	Rainfall Actual (m.m.)	Rainfall Actual (m.m.)	Rainfall Actual (m.m.)	Rainfall Actual (m.m.)
Maxi-mum	Mini-mum		2016	2017	2018	2019
40.3	10.3	1537	1371.5	1544.8	1321.6	1639.6

Table-1: Geographical Location and Climate of Paschim Medinipur District

4.1 Natural Resources: Paschim Medinipur is rich in a variety of environmental resources like land, forest and human resources. As per Census of India, total geographical area of Paschim Medinipur district in 2011 (6330.36 sq. km.). Total forest area of the district was 171.93 thousand hector.

Similarly, percentage shares of the district to all West Bengal area under orchard, permanent pasture and grazing land, barren and unculturable waste, culturable waste, fallow land other than current fallow were above its percentage share to its geographical area.

4.2 Land Use Pattern, Cropping Intensity and Irrigation

- Distribution of geographical area of the district and land use pattern across shows that Salboni block has the largest geographical area and the smallest block being Mohanpur.
- Narayangarh block records the largest net cropped area, the smallest being again Mohanpur.
- Area under pasture and orchard is largest in Salboni, the smallest being observed again in Mohanpur.
- It is revealed that Pingla block recorded in 2005-06 the highest cropping intensity (199 per cent) followed by Daspur-I, Sabang and Garbeta-I registering the lowest.

The Kangsabati Dam located on the Kumari and Kangsabati River at Mukutmonipur in Bankura District is the main irrigation scheme which provides water in agrarian fields for both Kharif and Rabi crops.

Ground water supports by dint of deep tubewells and shallow tubewells serve as supplementary irrigation.

4.3 Rain Recording Station:-

i) Total Number of Rain recording stations in Paschim Medinipur District.

- a) Midnapore SCRS [at Abash, Midnapore] Ph No.-03222-275680
- b) Pingla SARF [on Mundamari-Moyna Road, near Mundamari] Ph No.03222-217812

5. Hazard profile of the district

A Hazard, Risk and Vulnerability Assessment (HRVA) examine the **hazards** that may impact a community and the risk that each hazard event poses to the community as a whole and to vulnerable elements of the community. The objective of the Hazard, Vulnerability and Risk Analysis is to:

1. Investigate prominent natural and human caused events.
2. Identity any threat that may require timely response to protect lives, property and reduce economic loss.
3. Identity vulnerable groups who need more concern during any calamity.

5.1 IDENTIFICATION OF CYCLONE PRONE AREAS OF THIS DISTRICT

Dantan-I & II, Mohanpur, Narayangarh, Sabong, Keshiary Blocks are the most vulnerable blocks which are prone to cyclonic storm. Other parts of this district may also be affected.

5.2 STATUS OF CYCLONE WARNING CENTRES IN PASCHIM MEDINIPUR.

There is no permanent cyclone warning dissemination centre at Paschim Medinipur. On receipt of any cyclone message from IMD or Disaster Management Department it is disseminated to the concerned SDOs and BDOs.

Usually, all SDOs / BDOs are instructed to arrange for transmission of Cyclone message if any, at respective areas through announcement as and when required / instructed. All other concerned departments are instructed to arrange for emergent relief accordingly.

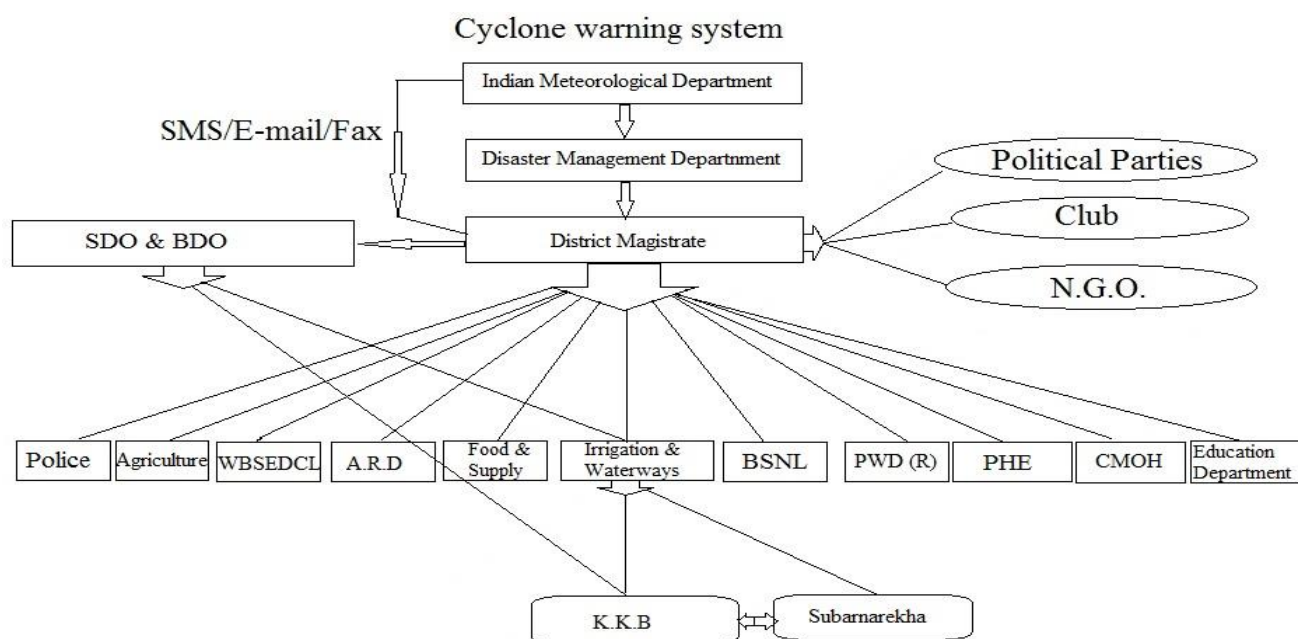

5.3 FOUR STAGE CYCLONE WARNING SYSTEM:

Stage I: With the formation of Depression over Bay of Bengal, the Chief Secretary, Govt. of West Bengal is informed by the Director General of Meteorology, IMD about its formation, location and potential danger.

Stage II : When the depression is likely to intensify into a cyclone storm or of higher intensity and likely to hit West Bengal coast within next 48 hours the numbered cyclone alert messages are issued at regular intervals and the message is passed to the Govt. of West Bengal over fax also to AIR/TV for repeated broadcast. All the concerned officials are advised to remain in touch with IMD for latest development. Fishermen warnings are also issued regularly.

Stage III: When the CS/SCS/VSCS/Super Cyclone is likely to hit West Bengal coast within 24 hours, numbered cyclone warning bulletins are issued six times a day to Govt. of West Bengal and also to AIR/TV for repeated broadcast.

Stage IV: After crossing the coast a de-warning message is issued.

5.4 RISK ANALYSIS

➤ Flood

The main reasons for flood in the district are as following-

1. A dam at the confluence of river Kangsabati and river Kumari at Ambikanagar in the district of Bankura was constructed for providing irrigation as well as insurance against drought and moderate floods in the area. Before construction of Dam, there was free flow through the river and the river was capable to carry adequate floodwater. After construction of Dam, water carrying capacity of the river has been reduced gradually due to siltation of the river bed and non-release of flushing dose from the dam time to time.
2. The down stream of the river gets silted up constantly due to tidal effect.
3. Besides, this lower part of the river has been jacketed by putting up and raising of ex-zamindari bundhs.
4. Due to the gentle longitudinal slope of the river bed it has lost drainage efficiency.
5. Construction of boro-bundhs across the river for Rabi and Boro irrigation are also causing siltation of the river-bed.
6. The major cause of flood in Kangsabati basin is not the local rainfall, but the spill way discharge of water from Kangsabati Dam. If the release of water from Kangsabati Dam can be regulated in a proper way, intensity of flood can be reduced.
7. Other rivers of the district such as Keleghai, Subarnarekha, Silabati, Rupnarayan are also causing floods due to the same reasons.

Year	Total rainfall
2016	1371.5 mm
2015	1449.7 mm
2014	1157.163 mm
2013	2331.26mm
2012	1113.3 mm.
2011	1717.9 mm.
2010	1001.1 mm.
2009	1270.1 mm.
2008	1780.44 mm.
2007	2106.0 mm.
2006	1298.8 mm.

5.4. A Risk Assessment:

Risk Level	Extent of damage
Damage risk level for earthquake	
High Damage Risk (H)	Gaps in walls; parts of buildings may collapse; separate parts of the building lose their cohesion; and inner walls collapse
Moderate Damage Risk (M)	Large and deep cracks on walls fall of chimneys on roofs.
Low damage Risk (L)	Small Cracks in walls; fall of fairly large pieces of plaster, pantiles slip off; cracks in chimneys, part may fall down.
Damage Risk levels for Wind Storms	
Very High Damage Risk (VH)	Generally similar to: High Risk” but damage is expected to be more widespread as in the case of cyclonic storms.
High Damage Risk (H)	Boundary walls overturn, walls in house and industrial structures fail; roofing sheets, and tiles or whole roofs fly; large scale destruction of life-line structures such as lighting and telephone poles, a few transmission line towers / communication towers <i>may</i> suffer damage; and non engineered / semi constructions suffer heavy damage.
Moderate Damage Risk (M)	Loose tiles of clay fly, roofs sheets fixed to battens fly; moderate damage to telephone and lighting poles; moderate damage to non-engineered/semi-engineered buildings.
Very Low damage Risk (VL)	Loose metal or fibre cement sheets fly; a few lighting and telephone poles go out of alignment; sign boards hoardings partially damaged; well detailed non-engineered/semi-engineered buildings suffer very little damage.
Damage Risk levels for Flood	
Very High Damage Risk (VH)	Total collapse of buildings; roof and some walls collapse; floating away of sheets, thatch etc; erosion of foundation; severe damage to life line structures and systems.
High Damage Risk (H)	Gaps in wall; punching of holes through wall by flowing water; parts of buildings may collapse; light roofs float away; erosion of foundation, sinking or tilting; undercutting of floors, partial roof collapse.
Moderate Damage Risk (M)	Large and deep cracks in walls; loss of belongings; damage to electric fittings.
Low damage Risk (L)	Small cracks in walls; fall of fairly large pieces of plaster
Very Low damage Risk (VL)	Fine cracks in plaster; fall of small pieces of plaster.

Table 7: Damage Risk Level for Earthquake, Wind Storms & Flood

5.5 DROUGHT

Drought has been described as a “creeping disaster” in the United Nations Publications. Thus emphasizing that a situation of drought develops gradually given sufficient warning of its coverage extents and intensity unlike a flood, cyclone or earthquake which offers little or no time and little opportunity for immediate planning and preparedness.

One of the essential preparatory measures is to keep a close watch on the behaviors of Monsoon and to initiate advance action to remove or minimize the unfavourable impact of weather conditions.

Action Plan for Drought:

A large portion of Paschim Medinipur District is a drought-prone area. This is due to undulating topography, laterite and porous soil having a little water holding capacity. Almost the whole western side of the district faces drought every year. The district had to face a severe drought in 2002 and it affected 24 blocks. As a result, cultivation of Aman paddy hampered tremendously and cattle lives were also affected. People of those affected blocks suffered a lot due to prevailing drought situation.

Objectives:

1. Focus on employment generation;
2. Speed up the pace of development creating employment and productive assets which would trigger the overall development;
3. Provide income generation activities to the affected population through SHGs for creating productive assets in affected areas e.g. water tanks, desilting of drainage canals, etc.

Suggestive areas of intervention:

1. Excavation / re-excavation of ponds and tanks for harvesting rain water;
2. Construction of field channels of RLI / DTW,
3. Construction of water harvesting structures and cross-bundhs on the rivulets / perennial water sources for cultivation of Rabi crops;
4. Development of waste lands;
5. Intensification of development activities in afforestation;
6. Repair / reconstruction of village roads;
7. Special wage employment programme for women/SC/ST population;
8. Regular monitoring of foodgrains supplies – prioritization on availability of foodgrains for wage employment programmes;
9. Activating self-help groups for income generation.

Action points for the Block / Gram Panchayat:

1. Changes in annual action plan already prepared under NREGS, if necessary, to combat the prevailing situation;
2. Fill up the ponds with water by connecting this with canals in advance;
3. Dove tailing of various schemes towards drought management in close coordination with all departments functioning at the district level;
4. Enhance the water harvesting structures;
5. Identify lands for eligible works;
6. Employment generation in suitable schemes in consultation with the Agriculture, I & W, Fishery, Forestry, Animal Resource and PW Deptts.
7. Activate SHGs for income generating activities;

8. Labour intensive works should be given top priority;
9. Awareness generation among the people for water harvesting and water recharging / preventing moisture evaporation.

6. SOME VALUABLE INFORMATION AND DISASTER SPECIFIC ACTION PLAN / STANDARD OPERATION PROCEDURE FOR PASCHIM MEDINIPUR DISTRICT ADMINISTRATION

6.1 FLOOD PRONE AREAS

The topography of the district is such that eastern part of the district is affected more than the western part of the district. The list of affected blocks and municipalities is as follows:

Name of the Sub-Division	Vulnerable Blocks / Municipality	Partly affected Blocks / Municipality	Water logging Blocks / Municipality
Ghatal	1. Ghatal	1. Chandrakona-I	1. Chandrakona-II
	2. Daspur-I	2. Kharar Municipality	2. Khirpai Municipality
	3. Daspur-II	3. Ramjibanpur Municipality	3. Chandrakona Municipality
	4. Chandrakona-I		4. Ghatal Municipality
	5. Chandrakona-II

Cash G.R.	Nil	Nil	Nil	Rs.5.00 Lakh
Starvation GR	Nil	Nil	Nil	Rs.5.00 Lakh

7. Earthquake Prone Zone: West Bengal

Bureau of Indian Standards, based on the past seismic history, grouped the country into four seismic zones, viz. Zone-II, -III, -IV and -V. Of these, Zone V is the most seismically active region, while zone II is the least. The Modified Mercalli (MM) intensity, which measures the impact of the earthquakes on the surface of the earth, broadly associated with various zones, is as follows:

7.1 Seismic Zone Intensity on MM scale

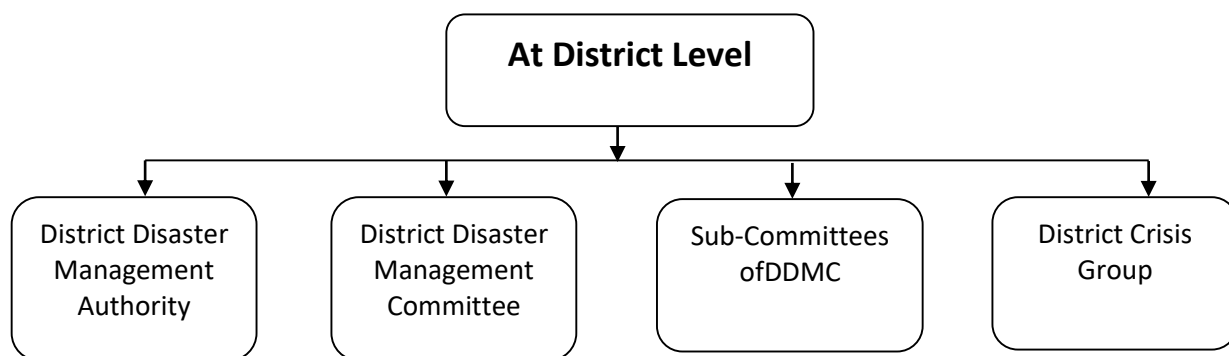

II (Low intensity zone)	VI (or less)
III (Moderate intensity zone)	VII
IV (Severe intensity zone)	VIII
V (Very severe intensity zone)	IX (and above)

Table 1 Earthquake Zonation of District of West Bengal

8. DISASTER MANAGEMENT: FUNCTIONAL STRUCTURE IN THE DISTRICT

The disaster management will be more effective and sustainable if it is institutionalized. For this purpose Government of India has already passed the Disaster Management Act, 2005 Act No.53 of 2005, on 23rd December, 2005, which has already been adopted by Government of West Bengal. The Government of West Bengal, in exercise of powers conferred by the Act, has established the West Bengal State Disaster Management Authority vide Notification No.1281-FR-1st August, 2007 and also established District Disaster Management Authority vide Notification No.1291-FR-1st August 2007. The District Magistrate is overall in charge for the entire disaster management activities in the District. As per Section 28 of the Disaster Management Act, 2005, the District Authority may constitute one or more Advisory Committee and District Disaster Management Committee for better implementation of disaster management activities in the district.

8.1 District Disaster Management Authority

As per Notification No.1291-FR-1st August, 2007 the District Disaster Management authority consisting Chairperson and six members having Head Quarter at District level has been established. It acts as the district planning; coordinating and implementing body for disaster management and takes all measures for the purpose of Disaster Management in accordance with the guidelines laid down by the National and the state Authority

District Disaster Management Authority (D.D.M.A.) (GO No.1308-FR dated 01.08.2007)

1. Collector of the District: **CHAIRPERSON**
2. Sabhadhipati of Zillah Parishad: **CO-CHAIRPERSON**
3. Addl. District Magistrate (Disaster Management) : **CEO, Ex-officio Member**
4. Superintendent of Police: Ex-officio Member
5. Chief Medical Officer of Health: Ex-officio Member
6. Executive Engineer, Irrigation : Ex-officio Member
7. All Sub-Divisional Officers : Ex-officio Member

At the District Level, there should be a District Disaster Management committee, at Block Level, there should be a Block Disaster Management Committee and at village level there should be village Disaster Management Committee.

Apart from these disaster management committees, at each level there should be a disaster management plan as per vulnerability to disaster of that particular area along with the various task forces like search and rescue, first aid, early warning system, food management, shelter management, dead body disposal force etc.

At the Village (Gram Panchayat) Level: Panchayat are the decision making bodies of all development activities in the villages. Therefore, every Panchayat should have a Village level Disaster Management Committee (VDMC) headed by the Pradhan which is responsible for carrying out activities from Planning to Execution in Disaster Management. There should be a separate village disaster management plan for every village as per vulnerability to disaster of the particular village. The plan encompasses prevention, mitigation and preparedness measures. The VDMC chaired by Pradhan includes, ward members, gramsevak, local Government functionaries including doctors/paramedics of primary health centers located in the village, primary school teachers etc. also a search and rescue team as well as first aid team have to be set up and trained at every village. The Disaster Management Teams at the village level will consist of members of youth organizations like Nehru Yuva Kendra and other non-governmental organizations as well as able bodied volunteers from the village. The teams are to be provided basic training in evacuation, search and rescue, first aid trauma counseling etc.

At Sansad Level:the village where Sansad members are members of VDMC they should get involved in taking all sort of major decisions related to Disaster Management, whether it is the Disaster Management Preparedness Plan or preparation to respond during the disaster. They are important identities in the village representing the community. **The Disaster Management Committee will review the disaster management plan at least once in a year.** It would also generated awareness among the people in the village about do's and do not do's for specific hazards depending on the vulnerability of the village.

At Block Level: every Block in the district should have a Block Disaster Management Committee headed by Chairperson Panchayat Samiti and all line departments at block level are its members.

At District Level: the District Disaster Management Authority and district disaster management committee should be constituted under the chairmanship of District Magistrate and Sabhadhipati respectively.

The District Disaster Management Authority shall act as the District Planning; coordinating and implementing body for disaster management and take all measures for the purpose of disaster management in the district in accordance with the guidelines laid down by the National Authority and the State Authority.

8.2 The role of District Disaster Management Authority

- I. Prepare a disaster management plan including district response plan for the district;
- II. Coordinate and monitor the implementation of the National Policy, West Bengal State Disaster Management Policy, national Disaster Management plan, West Bengal Disaster Management Plan and District Disaster Management Plan;
- III. Ensure that the areas in the district vulnerable to disasters are identified and measures for the prevention of disasters and the mitigation of its effects are undertaken by the departments of the Government at the district level as well as by the local authorities.
- IV. Ensure that the guidelines for prevention of disasters, mitigation of its effects, preparedness and response measures as laid down by the National Authority and the West Bengal State Authority are followed by all departments of the Government at the district level and the local authorities in the district;
- V. Give directions to different authorities at the district level and local authorities to take such other measures for the prevention or mitigation of disasters as may be necessary.
- VI. Lay down guidelines for prevention of disaster management plans by the departments of the Government at the districts level and local authorities in the district;
- VII. Monitor the implementation of disaster management plans prepared by the departments of the Government at the district level.
- VIII. Lay down guidelines to be followed by the Departments of the West Bengal Government at the district level for purpose of integration of measures for prevention of disasters and mitigation in their developmental plans and projects and provide necessary technical assistance therefore;
- IX. Monitor the implementation of measures referred to in Item N.
- X. Review the state capabilities for responding to any disaster or threatening disaster situation in the district and give directions to the relevant departments or authorities at the district level for their up-gradation as may be necessary.
- XI. Review the preparation measures and give directions to the concerned departments at the district level or other concerned authorities where necessary for bringing the preparedness measures to the levels required for responding effectively to any disaster or threatening disaster situation;
- XII. Organize and coordinate specialized training programmes for different levels of officers, employees and voluntary rescue workers in the district;
- XIII. Facilitate community training and awareness programmes for prevention of disaster or mitigation with the support local authorities, government and non-governmental organisations;

- XIV. Set up, maintain, review and upgrade the mechanism for early warnings and dissemination of proper information to public;
- XV. Prepare, review and update district level response plan and guidelines;
- XVI. Coordinate response to any threatening disaster situation or disaster;
- XVII. Ensure that the departments of the Government at the district level and the local authorities prepare their response plans in accordance with the district response plan;
- XVIII. Lay down guidelines for, or give direction to, the concerned department of the Government at the district level or any other authorities within the local limits of the district to take measures to respond effectively to any threatening disaster situation or disaster;
- XIX. Advise, assist and coordinate the activities of the Departments of the Government at the district level, statutory bodies and other governmental and nongovernmental organisations in the district engaged in the disaster management;
- XX. Coordinate with, and give guidelines to, local authorities in the district to ensure that measures for the prevention or mitigation of threatening disaster situation or disaster in the district are carried out promptly and effectively;
- XXI. Provide necessary technical assistance or give advice to the local authorities in the district for carrying out their functions;
- XXII. Review development plans prepared by the Departments of the Government at the district level, statutory authorities or local authorities with a view to make necessary provisions therein for prevention of disaster or mitigation.
- XXIII. Examine the construction in any area in the district and, if it is of the opinion that the standards for the prevention of disaster or mitigation laid down for such construction is not being or has not been followed, may direct the concerned authority to take such action as may be necessary to secure compliance of such standards;
- XXIV. Identify buildings and places which could, in the event of any threatening disaster situation or disaster, be used as relief centres or camps and make arrangements for water supply and sanitation in such buildings or places;
- XXV. Establish stockpiles of relief and rescue materials or ensure preparedness to make such materials available at a short notice;
- XXVI. Provide information to the State Authority relative to different aspects of disaster management;
- XXVII. Encourage the involvement of non-governmental organisations and voluntary social-welfare institutions working at the grassroots level in the district for disaster management;
- XXVIII. Ensure communication systems are in order, and disaster management drills are carried out periodically;
- XXIX. Perform such other functions as the West Bengal Government or the West Bengal Disaster Management authority may assign to it or it deems necessary for disaster management in the district.

8.3 Authority for DDMP

DISTRICT DISASTER MANAGEMENT COMMITTEE, PASCHIM MEDINIPUR

1. The Sabhadhipati, Zilla Parishad, Paschim Medinipur	Chairman
2. The District Magistrate, Paschim Medinipur	Vice-chairman
3. The Additional District Magistrate (Gen), Paschim Medinipur	Member Secretary
4. The Superintendent of Police, Paschim Medinipur	Member
5. The Karmadhakshya, Tran Sthayee Samity, Zilla Parishad, Paschim Medinipur.	Member
6. The Chief Medical Officer of Health., Paschim Medinipur	Member
7. The Executive Engineer, P.W.D., Paschim Medinipur	Member
8. The Executive Engineer, P.H.E., Paschim Medinipur	Member
9. The Executive Engineer, I.&W.Deptt., Paschim Medinipur	Member
10. The Principal Agriculture Officer, Paschim Medinipur	Member
11. The District Animal Resources Dev. Officer, Paschim Medinipur	Member
12. The District Disaster Management Officer, Paschim Medinipur	Member
13. The District Inspector of Schools (Primary), Paschim Medinipur	Member
14. The District Inspector of Schools (Secondary), Paschim Medinipur	Member
15. Hon'ble Members of Legislative Assembly (All MLAs of Paschim Medinipur District)	Member

8.4 Evolution of DDMP

The Disaster Management Act, 2005, (23 December 2005) No. 53 of 2005, was passed by the Rajya Sabha, the upper house of the Parliament of India on 28 November, and by the Lok Sabha, the lower house of the Parliament, on 12 December 2005. It received the assent of The President of India on 9 January 2006. The Disaster Management Act, 2005 has 11 chapters and 79 sections.

It clearly indicates all states and all District of India has to create a Disaster Management Plan.

8.5 Nodal ministries related to various disasters

- Earthquakes and Tsunami- MHA/Ministry of Earth Sciences/IMD
- Floods- MHA/Ministry of Water Resources/CWC
- Cyclones- MHA/Ministry of Earth Sciences/IMD
- Drought- Ministry of Agriculture
- Biological Disasters- Ministry of Health and Family Welfare
- Chemical Disasters- Ministry of Environment & Forests
- Nuclear Disasters- Department of Atomic Energy
- Air Accidents- Ministry of Civil Aviation
- Railway Accidents- Ministry of Railways
- Terrorism, bombblast, Riots-Ministry of Home Affairs

8.6 District Crisis Management Group (GO No.401 (35)-RL/O/I/7M-37/08 dated 03.03.2016)

- 1) The District Magistrate will head the District Crisis Management Group. It will have the following members:
 - a) Commissioner of Police / Superintendent of Police
 - b) A representative of IB
 - c) Dy. Development Commissioner / Additional District Magistrate

Any other district officer, as appropriate may be co-opted as a member, senior most officer of the Armed Forces and CAPFs posted in the district be also included in the Group. Where the NSG have been requisitioned for assistance, the NSG Task Force Commander may be co-opted as a member. Where NDRF is deployed or stationed, their representative may be co-opted as a member.

- 2) This Group will be responsible for on-scene management of the incident / emergency in the district level. All agencies will provide resources to this Group as required. Where a specialist Response team is deputed by the State / Central Group, this Group will normally abide by the advice of the said specialist Response team; but the ultimate decision will be that of the District / State Crisis Management Group.
- 3) There is a Control Room at the State level and there will be at district level during the monsoon season. The Control Room will be linked to the Control of the Ministry of Home Affairs by telephones, fax, internet and satellite phones.
- 4) Regular communication exercise shall be conducted with all stakeholders.
- 5) District Crisis Management Group will also meet periodically at least once in three months and as and when a crisis is at hand.
- 6) The District Magistrate will brief the media suitably from time to time regarding the progress in handling the contingency / emergency.

9. Departmental Action Plan

9.1 Action Plan for IRRIGATION & WATERWAYS DIRECTORATE WEST MIDNAPORE DIVISION

A) The following River Gauge & Rain Gauge Station has been maintained by this Division

Sl. No.	Stations	River	P.D.L.(M) M.G.T.S.	D.L.(M) M.G.T.S.	E.D.L.(M) M.G.T.S.	HFL (M)	Remarks
1	Midnapore						Rain Gauge
2	Mohanpur	Kangsaboti/ Cossye	25.45	25.75	26.36		River Gauge
3	Saldahari	Old Cossye	15.39	16	16.61		Do
4	Gadhhat	Silabati	8.38	8.99	9.60	11.12	Rain Gauge & River Gauge
5	Banka	Silabati	14.47	15.08	15.69	16.34	River Gauge
6	Bandar	Rupnarayan	6.24	6.85	7.46	9.47	Do
7	Ranichak	Rupnarayan	4.72	5.33	5.94	9.14	Do
8	Gopigang	Rupnarayan	4.42	5.03	5.65	8.41	Do
9	Old Cossye	Kalmijole	8.68	9.29	9.90	11.12	Do

B. Reporting of River Gauges & Rain Gauges at different Authorities.

Rain gauge stations are maintaining under this Division at i) Midnapore. (ii) Gopiballavpur, (iii) Gadghat. Daily river gauge reports are to be collected from C.W.C. in connection with Kangsaboti Project. River & Rain gauge data will be prepared as per approved format and weekly format as per G.F.C.C. Proforma and sent to the following authorities :-

- i) District Magistrate, Paschim Medinipur.
- ii) Chief Engineer's flood cell

C) Weekly flood inspection report:

Weekly flood report is to be submitted by the concerned Sub-Divisional Officer as usual following last year's procedure.

D) As reported by the Sub- Divisional Officers & Sub Assistant Engineers (regarding stock):-

1) The stock position of empty cement poly bags at different stations are as follows:-

Sl.No	Name of Sub-Division	Name of Section	No. of empty poly bag	No. of nylon crates
1	a) Lacchmapore Irrigation Subdivision:-			
	i) Lacchmapore Section		2000	Nil
	ii) Khanamohan Section		49000	1000
	iii) Anicut (Hd. Qtr.) Section		16400	1848
	iv) Balichak Section		5000	Nil
	v) Anicut Section		0	Nil
	vi) Simlageria Section		240	Nil
	Total		76640	2848
2	B) Ghatal (I) Sub-Division			

E) Hiring of boats & operating, regulating gates and fall boards

- i. Quotation for hiring of boat will be invited and sent to the Division Office within 1st June-2020. Work order may be issued as and when situation arises (1 No. boat will be hired at Khanamohan).

F) Sealing of sluices, unauthorised pipes

Work order for sealing of sluices and unauthorised pipes will be given by the concerned authority within 15.06.2020, (6 Nos. of sluices required to be sealed in TE2H2 embankment).

G) Flood fighting works

Flood fighting works will be undertaken as and when necessary under prior intimation to The District Magistrate and obtaining permission from higher official of I&W Dte.

In the event of any breach, report will be at once transmitted to Sabhadhipati & Karmadakshya, Paschim Medinipur Zilla Parishad, Block Development Officer of concerned Block & Sub Divisional Officer of concerned Sub Division & Higher officer of I&W Dte. Repair of breach can only be taken with prior permission of Government with written requisition from The District Magistrate and Sabhadhipati to take up such work. UC in connection with issued poly bags to GPs in required from concerned BDOs.

H) Flood embankments:-

1. Under Lachmapur sub-division:
 - a. TE1H1- 14.50km
 - b. TE2H2- 14km
 - c. TE3H2- 15km
 - d. Kalichandi- 37.52km

LATEST POSITION OF EMBANKMENTS

At Ghatal (I) Sub-Division breached portion of MC & DC embankment has been repaired. Further FPM work will be taken up soon.

I) Name of Embankments under West Midnapore Division:-

a) Lachmapore Irrigation Sub-Division:-

Sl.No.	Name of River	Name of Embankment	Chain age From To	Length
1	Cossye	Phase-I Cossye Left	0.00 Km. to 7.10Km.	7.10Km.
2	Cossye	Phase-II Cossye Left	0.00m. To 17.00km.	17.00km.
3	Cossey	Schedule "D" Cossey Left	0.00m to 1.22 km	1.22 km.
4	Kalaichandi Khal	Kalaichandi Marginal	0.00Km. to 6.10 Km.	12.20Km.
5	New/Old Cossye & New Cossye	TE1H1	0.00Km. to 41.50Km.	41.50Km.
6	Old Cossye	TE2H2	0.00Km. to 14.00Km.	14.00Km.
7	New Cossye	TE3H2	14.00Km. to 29.00Km.	15.00Km.

Un-Protected Char land adjoining bank of rivers likely to be inundated during ensuing flood season of 2020 (which are not protected by embankments)

Major Rivers/Channels		Name of G.P. likely to be inundated	Name of Blocks	Approx. Quantum of Vulnerable area (in)Hectare	Remarks if any
Sl no	1	2	3	4	5
1	Kaliaghai	Khursi (270 Ha), Kushbasab (410 Ha), Bakhrabad (80 Ha), Narayangarh (30 Ha)	Narayangarh	790.00	No right embkt between Rajpur to Bakhrabad and above. NO left embkt between Duria to paharpur and beyond Gobindopur
2	Deuli-Kaliaghai	Dashagram (40 Ha), Sarta (80Ha)	Sabang	120.00	No left embkt of Deuli beyond 1.0km and no right embkt beyond 5.0km
3	Kapaleswari – Kaliaghai	Bishnupur	Sabang	575.00	In between Kapaleswari & Kaliaghai No right embkt of Kapaleswari and No left Embkt of Kaliaghai. Popularly known as Salmarar jala

b) Ghatal Irrigation Subdivision:-

1	Old Cossye / Kanki / Silabati / Rupnarayan / Palashpai Khal	Chetua Circuit	0.00 Km. to 72.00 Km.	72.00Km.
2	Durbachati (L/S)/Rupnarayan (R/S)/Palashpai Khal(R/S)	Mohankhali Circuit	0.00 Km. to 51.00 Km.	51.00Km.
3	Old Cossye/Durbachati/Bhasra Khal	Dushapur Circuit	0.00 Km. to 30.00 Km.	30.00Km.

c) Asui- Dharampur(R/B of river Subarnarekha) - 2.70 km.

Sizua. Gopiballavpur - 2.70 km.

Kapasias - Mohanala - 0.90 km.

d) Name of the Sluices:-

Under Khanamohan Section:-

- i) Talbandi Sluice, Ch12.00Km. Of TE2H2, L/B of Cossye.
- ii) Mokarimpur Sluice Ch. 16.00Km of TE3H2.
- iii) Gopalpur Sluice Ch 21.60Km of TE3H2
- iv) Guapat Sluice Ch.23.00 kM. of TE3H2
- iv) Baikunthapur Sluice Ch.2.00 kM of TE2H2 L/B of old Cossye.

e) Under Anicut Section:-

- i) Bisripat Sluice.
- ii) Kulda Sluice. (up & down)
- iii) Cherua Sluice (up).
- iv) Cherua Sluice (down) 2 vent.
- v) Birsingpur Sluice.
- vi) Jamkunda Sluice.
- vii) Pathra Sluice.
- viii) Hanshpur Sluice.
- ix) Paikarapur Sluice.

f) Ghatal Irrigation Sub-Division:-

- i) One No. Sluice at Goura.
- ii) Total 52 Nos. Sluice at Ghatal Sub-Division.

g) Borrow Bundh:

Ghatal Irrigation Sub-Division:

There are three nos borrow bundh Kalmijole borrow bundh & Temohani borrow bundh should be removed before onset of monsoon is extremely urgent.

L) Drainage Channel:-

a) Lachmapore Irrigation Sub-Division:-

Under Khanamohan Section:-

- a) Rambhadrapur Ch. 12.90 of TE1H1.
- b) Tabageria ch.28.90 of TE1H1
- c) Bhudhas Ch.30.00 of TE1H1
- d) Ghunghuni Ch.30.00 of TE1H1

9.2 Action Plan for KALIAGHAI-KAPALESWARI-BAGHAI Project Division under Western Circle -II, I&W DTE. Temathani, Sabong, paschim Medinipur

The following arrangements have been programmed as **Disaster Management Plan 2020** under Kaliaghai-Kapaleswari-Baghai Project Division, I & W Dte., Midanapore, Paschim Medinipur. :-

1. PREVENTION:

a) PRE FLOOD INSPECTION REPORT:-

Pre-Flood Inspection Report prepared by the concerned Sub Divisional Officers under this Division prior to pre-monsoon rainfall and according to that report Pre-Monsoon Works will be taken up and monitored so as to reduce vulnerability first and complete the works in time. Based on this report as well as previous year's experience, vulnerability mapping has been done as follows:-

Name of Embankment	Total Embkt Length (Km)	Weak / Vulnerable Zones (Length/Ch)	Location (Mouza /Block)	Reason of its vulnerability (Slip/Ghoge/ Depression etc.)	Area/population likely to be affected (GP/Block)	Remarks
Kaliaghai Left	33.50	Nil	-	-	-	strengthening & widening has been done from Chaulkuri to Gobindapur
Kaleswari Left	20.00	Nil	-	-	-	
Kapaleswari Right	14.00	Nil	-	-	-	
Ex-Jamindari Embankments						
Deuli Right	5.00	0.10 Km	Chak Safi, Ramchak	Minor Slip, Narrow & week embkt	Dashagram GP/ Sabang	22° 6'15.66"N, 87°32'19.43"E to 22° 6'17.79"N, 87°32'5.60"E work at 2 spot taken up
Deuli Left	1.00	Nil	-	-	-	
Choulkuri Circuit	6.50	1.00Km	Chaulkuri, Eral	Narrow & week embkt	Chaulkuri GP/ Sabang	22° 6'34.29"N, 87°35'34.09"E to 22° 8'8.98"N, 87°34'31.84"E
Kharika Circuit	9.00	0.75 Km	-	Narrow & week embkt	Chaulkuri GP/ Sabang	22° 7'47.26"N, 87°34'35.30"E to 22° 6'24.21"N, 87°35'33.62"E
Kharika Right	2.50	0.25Km	-	Narrow & week embkt	Chaulkuri GP/ Sabang	22° 6'19.42"N, 87°35'18.06"E to 22° 6'55.39"N, 87°34'46.06"E
Amrakhali Right	12.00	Nil	-	-	-	
Amrakhali Left	7.50	Nil	-	-	-	
Kalchiti Right	3.00	2.50Km	-	Minor Slip, Narrow & week embkt	Narayanbar GP/ Sabang	22°10'6.86"N, 87°38'14.38"E to 22° 8'36.18"N, 87°38'23.41"E, work at 4 spot taken up
Kalchiti Left	3.00	3.00Km	Bural	Minor Slip, Narrow & week embkt	Bural GP/ Sabang	
Mirjapur Khal Right	2.50	Nil	-	-	-	
Mirjapur Khal Left	2.50	Nil	-	-	-	
Kalimondap Right	6.70	Nil	-	-	-	
Kalimondap Left	7.00	Nil	-	-	-	
Ganapath Right	8.00	Nil	-	-	-	
Ganapath Left	8.00	Nil	-	-	-	
Banskona Right	5.50	Nil	-	-	-	
Banskona Left	5.50	Nil	-	-	-	
	166.70					

Besides above embankments, two sluice Gates at kamarpota (Bishnupur/Sabang – work cant be done previously due to technically unfeasible demand of local people), Rajpur (Rajpur/Narayangarh – Tender not matured two times) are primarily considered as vulnerable and are to be sealed during high flood.

Apart from the above **Un-protected ‘Char’ land adjoining bank of rivers likely to be inundated during ongoing flood season of 2018 (which are not protected by embankments)** are identified as follows

Major Rivers / Channels		Name of Gram Panchayets likely to be inundated	Name of Blocks	Approximate quantum of vulnerable area (in hectare)	Remarks (if any)
1		2	3	4	5
1	Kapaleswari-Kaliaghai	Bishnupur	Sabang of Paschim Medinipur	575.00	In between Kapaleswari & Kaliaghai. No right embankment of Kapaleswari and no left embankment of Kaliaghai. Popularly known as Salmarar Jala
2	Deuli-Kaliaghai	Dashagram (40 Ha), Sarta (80 Ha)	Sabang of Paschim Medinipur	120.00	No Left Embkt of Deuli beyond 1.0Km and No right embankment beyond 5.0Km
3	Kaliaghai	Khursi (270 Ha) , Kushbasan (410 Ha), Bakhrabad (80 Ha), Narayangarh (30 Ha)	Narayangarh of Paschim Medinipur	790.00	No Right Embkt between Rajpur to Bakhrabad and above, No Left Embkt between Duria to Paharpur and beyond Gobindapur

There is no case of *habitation on ‘Char’ land protected by embankments and likely to be inundated during high discharge through rivers* under the jurisdiction of this Division.

b) REMOVAL OF CROSS BUNDHS & FISHING PATTAS:-

Cross Bundhs & Fishing Pattas on river bed are a vital part to create obstruction on drainage congestion of the rivers and channels mainly over river Kapaleswari & Kaliaghai at Sabang, Narayanbarh, Dasagram & Gokulpur areas which should be removed within 15th June -2019 with the help of Administration and the Department by a joint programme by canvassing the local people and removing those obstruction. Kind Co-operations will be solicited from the local public representatives, B.D.O. of concerned block and administration to overcome the obstruction for the public interest and to avoid the flood situation on flood prone areas.

c) WORKS ON VULNERABLE ZONES:-

Since 2011 i.e. inception of this Division, repair to damages of Ex-Zamindary embankments are not undertaken by the concerned Panchayet authorities. Works of some portions were taken up by the Department in the previous years as per availability of fund considering its vulnerability in Kalchiti, Jarua, Kharika, Chaulkuri Circuit & Deuli Embankments.

Most of the Sluice gates, about 85 Nos sluices out of total 103, have already been repaired during last 3 years. Couple of sluice gates is yet to be repaired and oiling-greasing of all sluices will be done before monsoon.

15 Nos wooden bridge are to be repaired/reconstructed out of total 55. Other wooden bridges are either reconstructed or repaired within last 2-3 years and in workable condition. To reduce the frequency of repair of wooden bridge, composite bridge technology (i.e. wooden Pile & decking with steel beams) has been introduced.

2. Preparedness:

a) RIVER GAUGE & RAIN GAUGH STATIONS:-

Salient data of River Gauges/Rain Gauge maintained under this Division is as follows

Sl No.	Stations	River	P.D.L.(M) G.T.S	D.L.(M) G.T.S	E.D.L.(M) G.T.S
1	Bhakrabad (on Belda Road : 22.129039°N, 87.378866°E)	Kaliaghai	7.95	8.40	8.85
2	Dehati (on Patashpur Road : 22.090389°N, 87.494952°E)	Kaliaghai	5.95	6.55	7.00
3	Narayanbarh (Near Mohinibazar Bridge : 22.131670°N, 87.601270°E)	Kapaleswari	4.72	5.33	5.94
4	Kalimondop (22.160883°N, 87.703484°E)	Kaliaghai	4.40	5.00	5.33

River Gauge Stations are to be maintained by the K.K.B.Project Sub-Division No.- I (Bhakrabad & Dehati) and K.K.B.Project Sub-Division No.III (Kalimondop & Narayanbarh). Rain Gauge Stations is to be maintained by the K.K.B.Project Sub-Division No. - III under this Division at Sabang.

River & rain Gauge Data will be prepared as per approved format of G.F.C.C. proforma and sent to the Higher Authority daily/weekly.

Weekly flood report is to be submitted by the concerned Sub Divisional Officer (K.K.B.Project Sub-Division No.III) as usual following last year's procedure.

b) CONTROL ROOM:-

Control Room will be opened on & from 15.06.2020 like every year in the following offices as usual

- K.K.B. Project Division & K.K.B. Project Sub Division No.-I, at Temathani, Sabang (22°13'16.90"N, 87°33'55.22"E), ph. 03222-248005/248114/7602602180
- K.K.B. Project Sub Division No.-II, at Sabang (22°10'36.85"N, 87°35'42.56"E), ph. 03222-249066 /9732874916
- K.K.B. Project Sub Division No.III at Sabang (22°10'48.05"N, 87°35'38.79"E) ph. 03222-249329/9679141434
-

All the Sub-Divisional Officers will prepare the Roster Duty Chart for control room duty.

c) STOCK POSITION OF EMPTY POLY BAGS & NYLON CRATES:

A. The Stock Position of Poly bags at different stations are as follows:

- (i) K.K.B. Project Sub Division No.-I, at Temathani office complex (22°13'31.49"N, 87°33'38.73"E)= 15725 nos,
- (ii) K.K.B. Project Sub Division No.-III at Sabang Office Complex (22°10'36.85"N, 87°35'42.56"E) = 22346 nos.

B. The Stock Position of Nylon Crates at different stations as follows:

- (i) K.K.B. Project Sub Division No.- I at Temathani office complex = 945 nos.
- (ii) K.K.B. Project Sub Division No.-III Sabang Office Complex = 490 nos.

d) HIRING OF BOATS & OPERATING REGULATOR GATES AND FALL BOARDS:-

Decision for Hiring of boat will be taken as and when situation demands.

Generally sluice gates are operated by the local farmers / Panchayet functionaries as per their requirement throughout the year. So, decision for engagement for operating regulator gates and guarding & operation of Fall Boards will be taken as and when situation arises.

e) Collection of Information of event and response:-

People of the locality and Panchayet Functionaries are generally main source of information during crisis period for the vast jurisdiction consisting of 166Km embankment, 102 Nos Sluice & 62 Nos Wooden Bridge. Communication Nos of control room for the respective area are available to the concern people of the locality. Besides, frequent visit of vulnerable zones are also been made by concerned Sub-Divisional staffs. As soon as information received it was attended for evaluation of its severity and taken up remedial reassures accordingly. Basically two types of events are to attend, firstly leakage through sluice gate and other is slip/slide/ghoge in embankment. **But main problem in time of crisis is found to be false or truly speaking exaggerated report of happening.**

3. Relief

a) FLOOD FIGHTING WORKS:-

Flood fighting works will be undertaken as and when necessary under prior intimation to District Magistrate after obtaining permission from the Higher Authority of the I & W Dte.

In the event of any breach, report will be at once transmitted to Sabhaddhipati & Karmadakshya, Paschim Medinipur Zilla Parishad & Purba Medinipur Zilla Parishad, Block Development Officer of concerned Block & Sub Divisional Officer of concerned Sub Division & Higher Authority of I & W Dte. Repair works will only be taken up with prior permission of the Higher Authority of the I. & W. Dte. and with written requisition from District Magistrate and Sabhaddhipati of concerned Area to take up such work.

Materials for Flood Fighting works i.e. Poly bags, Nylone Crate will be supplied from Stock kept in two vital position of entire jurisdiction i.e. at Sabang Godown & at Dehati Camp Office and if situation arises, further procurement will also initiated.

4. Recovery

The restoration works on the embankments, Inspection Path, Sluice, Bridge of river Kaliaghai, Kapaleswari and other Khals which will be damaged will be taken up case basis either during monsoon or after monsoon.

9.3 Action Plan for FOOD & SUPPLIES DEPARTMENT

Rolling reserve the stock of Rice will be build up at the Godowns of MR Distributors in the flood prone areas of the District.

Rolling reserve a stock of Rice:-

To build up rolling reserved stock of Rice (Procured Rice-Common boiled) at the Godowns of M.R. Distributors in the flood prone areas of the District.

The said Rice will be handed over to the S.D.O.s / B.D.O.s as and when necessary subject to its replenishment forthwith by special G.R. Rice of the same variety.

Reserve a stock of K. Oil: -

To build rolling reserve stock of K. Oil @ 5 K.L. / K. Oil Agent in the vulnerable pockets of this District.

The said reserved stock will be made available out of normal monthly quota by adjusting scale of distribution if necessary in consultation with the S.D.O.s. Necessary instruction to this effect will be issued to the Sub-Divisional Controllers.

Kharagpur Sub-Division

Sl. No.	Name of the Agent	Address
1.	M/s. C.R. Das	Vill. + P.O. - Lutunia, P.S. Sabang.
2.	National Oil Agency	Vill. + P.O. - Balichak, P.S. - Debra.

Total:		9161

9.4 Action Plan for SUPERINTENDENT OF POLICE, Paschim Medinipur

A) A District Police Disaster Management Group may be formed comprising :

- i) Addl. Supdt. of Police (HQ), Paschim Medinipur as Nodal Officer
 - ii) All Zonal Dy.SsP, Paschim Medinipur
 - iii) All CIs of Paschim Medinipur
 - iv) All ICs/OCs of Paschim Medinipur
 - v) OC Control Room, Paschim Medinipur
 - vi) RI, Paschim Medinipur
 - vii) MTO, Paschim Medinipur
- B) ICs and OCs in co-ordination with BDMO, BDO will collect prior intelligence on probable disaster and cater the same to all zonal superiors and OC Control Room.
- C) After commission of disaster ICs/OCs of PSs shall take part in rescue operation in consultation with respective BDOs with available force and officers.
- D) ICs/OCs after consulting with zonal superiors and examining the gravity of disaster shall open a Control Room in the disaster affected places.
- E) Such Control Room shall have all facilities as per standard rule.
- F) Control Room shall have a GD Book for recording grievance and annals of loss of property of disaster affected people.
- G) Escort for food and other relief materials shall be provided by the respective ICs/OCs whenever sought for.
- H) Security to relief camp shall be provided by ICs/OCs whenever sought for.
- I) RI, Paschim Medinipur shall provide additional force and officer.
- J) MTO, Paschim Medinipur shall provide vehicle for movement of force and officer and escort of vehicle carrying relief materials.
- K) OC Control Room shall cater all information to all concerned.
- L) CIs shall personally supervise all activities of PSs regarding rescue operation, ensure that no untoward incident takes place at the time of distributing relief materials and ensure security of relief camp.
- M) Six (06) Teams to be formed for implementation the Disaster Management Plan of Police in combating against Flood / Cyclone :

Team One

To be placed at the PO for conducting of tasks relating to rescuing, shifting of injured persons to the hospitals and safe places.

Team Two

Will be placed at the place of shelter for the affected people and will be entrusted with the duty of looking after the servicing of food, drinking water and medicines to the rescued persons.

Team Three

To be placed at hospitals/health units etc. where injured to be shifted and ensure proper medical treatment of the injured persons.

Team Four

Will be engaged in sharing information through constant communication with the public from Special Control Room and venue.

Team Five

Will assist Team One and will ensure smooth and safe evacuation of the trapped flood/ cyclone affected people of the venue of the mass gathering.

Team Six

To be placed on District Headquarter to maintain liaison with various agencies. It will also keep liaison with the NGOs willing to provide voluntary service in such emergency situation and issue direction to them to act according to the plan and policy of the District Disaster Management Team of Police.

S.O.P ON DROWNING OF VEHICLE

1. OC of respective police jurisdiction shall inform District Disaster Management Officer (to send diver), District Control Room and Nodal Officer of the District (Addl. SP (HQ) and rush to the PO instantly.
2. OC Control Room shall inform all adjoining PSs to remain alert.
3. OC of respective police unit will cordon the place of occurrence and prevent onlookers, relatives of injured persons, media personnel from entering into place of occurrence and causing hindrance to rescue operation.
4. OC shall conduct operation in search of injured persons and dead bodies.
5. OC Control Room shall alert all nearest hospitals including Midnapore Medical College & Hospital to remain ready with life saving equipments.
6. Crane, Gas Cutter and other equipments to lift the drowning vehicle to be called.
7. Four teams to be formed for
 - a) Team – 1 to be placed at the PO for conducting all tasks relating to rescuing, shifting of injured persons to the hospital, searching etc.
 - b) Team – 2 to be placed at the hospital (where injured were shifted) to look after the injured persons
 - c) Team – 3 to be placed at District Control Room to cater various information
 - d) Team – 4 to be placed at District Headquarters to maintain liaison with various agencies.
8. Injured persons to be shifted to nearest hospital with facilities of caring drowning injuries quickly.
9. Nodal Officer of the district (Addl. SP (HQ), Paschim Medinipur shall inform to Disaster Management Group, 13th Bn. Barjora, Bankura for necessary action.
10. OC of respective Police Station shall canvass with the assistance of Public Alert System to prevent spreading rumour.
11. Forensic Team to be called to collect evidence from the place of occurrence.
12. On reaching of Disaster Management Group entire operation shall have to be handed over to them and necessary assistance, support to be provided whenever asked for.

S.O.P ON FIRE FIGHTING

1. OC of respective police jurisdiction shall inform Fire Fighting Agency, District Control Room and Nodal Officer of the District (Addl. SP (HQ) and rush to the PO instantly. He will alert all other members of the Disaster Management Team and will supervise the rescue operation. He will be responsible in sending an expert rescue team along with fire brigade to the place of occurrence and at the same time will activate all the units in sub-divisional and PS level District Management Team.
2. OC Control Room shall inform all adjoining PSs to remain alert.
3. OC of respective police unit will cordon the place of occurrence and prevent onlookers, relatives of injured persons, media personnel from entering into place of occurrence and causing hindrance to rescue operation.
4. OC shall conduct operation in search of injured persons and dead bodies.
5. OC Control Room shall alert all nearest hospitals including Midnapore Medical College & Hospital to remain ready with life saving equipments.
6. Four teams to be formed for
 - i) Team – 1 to be placed at the PO for conducting all tasks relating to rescuing, shifting of injured persons to the hospital, searching etc.
 - ii) Team – 2 to be placed at the hospital (where injured were shifted) to look after the injured persons.
 - iii) Team – 3 to be placed at District Control Room to cater various informations.
 - iv) Team – 4 to be placed at District Headquarters to maintain liaison with various agencies.
7. Injured persons to be shifted to nearest hospital with facilities of caring burnt injuries quickly.
8. Nodal Officer of the district (Addl. SP (HQ), Paschim Medinipur shall inform to Disaster Management Group, 13th Bn. Barjora, Bankura for necessary action.
9. OC of respective Police Station shall canvass with the assistance of Public Alert System to prevent spreading rumour.
10. Dog Squad to be called for rescue of injured persons and dead bodies.
11. Forensic Team to be called to collect evidence from the place of occurrence.
12. On reaching of Disaster Management Group entire operation shall have to be handed over to them and necessary assistance, support to be provided whenever asked for.

S.O.P ON COMBATING DISASTER IN THE VENUE OF MASS GATHERING

1. OC/IC of respective PS under which jurisdiction the disaster took place shall immediately inform the Disaster Management Officer of Police as well as alert District Control Room and Nodal Officer of the district and seek for necessary reinforcement.
2. The Chief Supervisory Officer, who is in-charge of the venue will at once sensitize all the other subordinate officers in all ranks under him to pass on the necessary information to the ground level officers so that communication should reach to the top of the District Police Administration and at the same time all the field level officers and police personnel deployed in the venue. All of them should be well aware of the disaster and take necessary action according to the 'Master Plan' which will be evolved by the District Disaster Management Team of Police considering the emergency of the situation. The officers and police personnel in the venue of disaster should implement the 'Action Plan' so far as the work of the crowd choked up in a place of mass gathering is concerned.
3. The trespassed crowd should be channelized through ongoing ways only and at the same time emergency 'Entry & Exit' points should be made open for easy dispersion of crowd.
4. District Disaster Management Team of Police should communicate Health Department, Fire Department and other emergency services for their additional reinforcement in the disaster affected venue as early as possible.

5. The District Disaster Management Team of Police should contact with the Civil Defence Team and ask them to rush to the spot on emergency basis.
6. The Nodal Officer of Traffic, i.e. Dy. Supdt. of Police (Traffic), Paschim Medinipur will take initiative in making adequate traffic management in an around the vicinity of the disaster affected venue for smooth and early evacuation of the dispersed crowd from venue to safe place.
7. Dy. Supdt. of Police (Traffic), Paschim Medinipur in consultation with concerned RTA will also arrange for additional public conveyance adjacent to the venue.
8. District Disaster Management Team of Police will immediately contact with the top level District Civil Administration and ensure the safe shelter of the dispersed crowd in the place of evacuation which should be kept ready with food, drinking water and medical facilities.
9. Nodal Officer of the district i.e. Addl. Supdt. of Police (HQ), Paschim Medinipur will direct all the senior supervisory officers in the rank of Dy. Supdts. of Police and Inspectors to move to the place along with adequate officers and force under their administrative jurisdiction.
10. A Sub-Control Room should be opened on 24 hours basis with the facilities of public address system for making constant communication with the panicked members of the crowd in the venue. This group will also ascertain so that unnecessarily no rumour can be spread to arouse panic among the masses.
11. OC/IC of the concerned PS will take the responsibility to display the Bus/Train Time Table at important locations of the town/city nearby the venue.
12. Up-to-date train running, specially the trains running late, can be displayed at appropriate locations to avoid crowd of the railway stations.
13. Senior officers deployed in the venue should ensure that 'Entry & Exit' points should not be blocked in any way as sometimes information seekers often use to assemble the 'Entry/Exit' points and eventually block the movement of the other visitors.
14. RI, Paschim Medinipur will mobilize adequate officers and force to the affected place from District Police Lines as well as from other units of the district.
15. MTO, Paschim Medinipur will provide adequate number of vehicles required for mobilization of the officers and force.
16. Forensic Team to be called to collect evidence from the place of occurrence.
17. Nodal Officer of the district, i.e. Addl. Supdt. of Police (HQ), Paschim Medinipur shall inform to Disaster Management Group, 13th Bn. Barjora, Bankura for necessary action.
18. Four teams to be formed for
 - e) Team – 1 to be placed at the PO for conducting all tasks relating to rescuing, shifting of injured persons to the hospital, searching etc.
 - f) Team – 2 to be placed at the hospital (where injured were shifted) to look after the injured persons.
 - g) Team – 3 to be placed at District Control Room to cater various information
 - h) Team – 4 to be placed at District Headquarters to maintain liaison with various agencies.

S.O.P ON COMBATING DISASTERS IN RAILWAY:

1. **Passenger Train:** A train intended solely or partly meant for the carriage of passengers shall be treated as a passenger train. A workmen's train or a ballast train or a material train or an accident relief train or a tower car or cattle special or military special carrying authorized escorts or similar such train shall be treated as a passenger train.
2. **Other Trains:** All other trains not covered under passenger trains shall be termed as other trains.
3. **Accident:** For the purpose of railway working, accident is an occurrence in the course of working of railway which does or may affect the safety of the railway, its engines, rolling stock, permanent way and works, fixed installations, passengers or railway servants or which affects the safety of others or which does or may cause delay to trains or loss to the railway. For statistical purposes, accidents have been classified in categories from "A" to "R" excluding "I" and "O".

NOTE: Except where specially mentioned, nothing in this applies to workshop accidents, which are covered by the Factory Act, 1948 and the Rules made there under.

4. **Injuries:** Injuries are classified as: (a) *Grievous injury* (b) *Simple injury*

Grievous injuries: As defined in section 320 of Indian Penal Code 45 of 1860 the following kinds of injuries are termed as grievous injuries: (a) Emasculation. (b) Permanent privation of the sight of either eye. (c) Permanent privation of the hearing of either ear. (d) Privation of any member, or joint. (e) Destruction or permanent impairing of the powers of any member, or joint. (f) Fracture or dislocation of a bone, or tooth. (g) Any hurt which endangers life or which causes the sufferer to be in severe body pain or unable to follow his ordinary pursuits for a period of 20 days after the accident.

Simple Injuries: a) A person will be considered to have incurred simple injuries, if these injuries incapacitate the injured person from pursuing his customary vocation for 48 hours after the occurrence of the accident. b) A railway employee is considered to have been injured if he/she is prevented from returning to work as a result of injuries for a period of 48 hours after the occurrence of the accident.

5. **Classification of Accidents:** Accidents are classified under following heads:

1. Train Accidents.
2. Yard Accidents
3. Indicative Accidents
4. Equipment Failures
5. Unusual Incidents

6. **Train Accident:** Train accident is an accident that involves a train. Train accidents are further divided as: a) Consequential train accidents, and b) Other train accidents.

7. **Consequential Train Accidents:** Include train accidents having serious repercussion in terms of- (a) loss of human life, (b) human injury, (c) loss to railway property, or (d) interruption to rail traffic

8. **Collisions:** This refers to the impact of a train against another train or vehicle. It includes head-on collision, rear collision and side collision. It does not include impact of wagons due to rough shunting without casualties and with negligible damage. It also excludes accidents at level crossings.

9. **Fire in Trains:** A fire in a train should be treated as a train accident only when it results in death or physical injury or loss (damage) of railway property with a value of 50,000 and above.

Note: The other cases of fire in trains, which do not come under this category, should be accounted separately as “Other Accidents” and should continue to be thoroughly investigated in order to find out their causes and to take effective action to prevent recurrence.

DUTIES of RAILWAY STAFF

Every Railway servant traveling by the affected train or available at the site, whether on duty or not, shall help in the disaster management by getting identified and rendering immediate assistance to the affected passengers at the site. Non-participation in accident relief operations will be considered as DERELICTION OF DUTY‘.

A. Guard of The Train Involved in Accident: The duties are given in the sequence in which they have to be performed. On occurrence of an accident to his train, the Guard of the train shall immediately:

1. Note the time of accident.
2. If the accident has occurred on a double line section, the Guard should immediately check if the adjoining line is fouling or not. If it is fouling, he should immediately exhibit red flag by day and flashing light by night towards the direction in which train is expected on the adjoining line. He will continue to exhibit the hand danger signal until the time the adjoining line is protected as per rules in force.
3. Arrange to protect his train as per Rules in force, taking the assistance of any qualified staff, such as Assistant Guard, Assistant Loco Pilot, gangmen, gatemen etc.
4. Make a quick survey of the accident site for casualties, injuries, if any, and for deciding the assistance required.
5. Send the first information of accident to the control office and then to the nearest Station Master furnishing the following information, through mobile phone or portable telephone, or walkie-talkie or gate phone, etc., a) Time of Accident, b) Kilometer etc.,
6. On the double line section a train passing on the other line should be stopped and the Loco Pilot and Guard given intimation about the accident if not already given vide para (5).
7. Render first aid to any person injured, obtaining assistance of the railway staff, doctors and / or volunteers on the train, or near the site of accident; and transport the injured to the hospital by taking the help of 104/108 Ambulance service.
8. He will also arrange for preservation of clues and evidence until a senior Railway official takes over charge.
9. Remain in general charge till a senior Railway Official takes over charge. There after work as per the instructions of the senior official in charge of the accident.

B. Engine Crew of the Train: On occurrence of an accident to a train, its crew shall:

1. Immediately switch on the Flasher Light. If flasher light is not working, exhibit hand danger signal so as to stop any train coming in the opposite direction on a double line section.
2. Note the time of accident.
3. Protect the adjacent line/lines/same line in accordance with rules in force.
4. Take such technical precautions as may be necessary or as prescribed by special instructions to render the locomotive safe.
5. Give information to Guards about the locomotive (derailed or not), condition of coaches/wagons immediately in rear of the loco and any other information relevant to the accident.
6. Send Assistant Loco Pilot to assist the Guard in establishing contact with control office, relief and rescue operations.

C. Station Master / Station Manager: [The Station Masters on either side of the block section if the accident occurred in the mid-section or the station master of the station where the accident has occurred.]

1. On a double line, immediately stop the trains proceeding into the affected block section in the opposite direction. If any train has already entered such block section, inform the crew and guard to immediately stop their train and tell them to proceed cautiously so as to stop short of any obstruction.
2. Report the accident to the Section Controller and to the Station Master at the other end of the block section.
3. Control to be advised regarding – a. Time, and nature of accident. b. Brief description of accident. c. Medical Relief van required or not d. The need for ART with or without crane e. Adjacent lines clear or not. f. Number of coaches/wagons derailed, canted, capsized, etc., g. Availability of road approach to the accident site,
4. Station Masters of Stations where sirens are provided shall sound the sirens and arrange to move the Medical Relief Van / ART special trains as per the control orders.
5. Advise the section Traffic Inspector and the officials of other departments by quickest possible means.
6. Call for off-duty Station Masters and points men for assistance in operations.
7. In case the accident occurs within station limits, the position of point knobs, signal knobs, route knobs, various readings of counters shall be kept intact till these are jointly recorded by the supervisors of Traffic, S&T and Engineering departments.
8. Keep the lines free at the station for receiving the un-affected coaches/wagons, MRV, ART, etc.,
9. He will arrange for the following assistance:
 - a). Medical Assistance:** (i) Assistance must be called for Ambulance service from the local Hospitals, Railway Hospitals and Health Units, Civil and Army Hospitals, St. John's Ambulance brigade, qualified first-aiders, firefighting personnel, and other qualified medical personnel available on trains and at stations. (ii) Injured passengers to be transported to the nearest hospitals, by the most expeditious means. (iii) Arrange for the quick transport of A.R.M.E. Scale

II equipment to the site of the accident. (iv) Arrange adequate number of First Aid boxes and stretchers.

b). Refreshments to Passengers: (i) Advise DCM / ACM for making available food and refreshments to stranded passengers. (ii) Arrange for drinking water & beverages from VRR / NVR and / or locally, free of cost to the affected passengers.

c) Transport Assistance: (i) Arrangements shall be made to transport the injured on top priority by road or by a special train to the hospitals. (ii) Stranded passengers to be transported from the accident spot by arranging transshipment either by train or by hiring Road vehicles. (iii) Arrange for refund of fares as per the extant rules.

d). Security Assistance: Station Master shall advise officials of Government Railway Police, State Police and the Railway Protection force to provide security to the private and railway property at the site of the accident. The Station master will also lodge an FIR with the jurisdiction GRP Inspector in case sabotage is suspected for the accident.

e) Communication Assistance: (i) Information counters to be opened at important stations and at the accident site. (ii) Information regarding the injured and dead shall be ascertained and given to the relatives whenever asked for. (iii) Free Phone with STD facilities shall be made available to the affected passengers to convey their condition to their relatives from the site and stations.

10. Controlling SM must proceed to the site by the quickest means taking with him sufficient porters and other staff who can assist in the relief operations.

11. SM/SMR shall ensure securing of records in cabin and Station, such as Private number book, train signal register, line admission book, engine log book and speed charts from the loco and other relevant records. He shall also ensure sealing of slides, levers, knobs and relay rooms.

12. Take all necessary action as prescribed by the rules and instructions in force.

D. Controlling Station Master: The controlling Station Master must proceed to the site of the accident by the quickest means. He must take with him coolies, lamps, and any other equipment that he considers necessary. Till relieved by a Traffic Inspector or Officer, he will be responsible for regulating the traffic, attending to the injured, making a note of all evidence which may prove useful in ascertaining the cause of the accident and taking general charge of the situation.

E. Train Superintendent / Travelling Ticket Examiner:

1. Ascertain if any Doctor is travelling by seeing the reservation chart and making verbal enquiries and arrange for First aid to the injured passengers.
2. Along with other TTEs in the train, he should assist the injured passengers to come out of their coaches. The TTEs should also help passengers trapped in the coaches to come out of the coaches.
3. Unclaimed luggage and other belongings should be handed over to the GRP with full details and acknowledgement obtained.
4. Prepare list of dead and injured. The list should be classified as under: DEAD GRIEVOUSLY INJURED SIMPLE INJURED Details of the dead and injured should be obtained from the reservation chart, tickets held (to and from) or co-passengers. Assistance of the Police travelling in the train to be obtained also for identification.
5. The following details should be collected: a) Tickets of the Passengers travelling (to and from) b) Ticket Numbers – Class c) Coach Number and its position from the engine d) Address of the passengers e) Nature of injury (Simple, Grievous)
6. He should keep record of the number of dead and injured (simple, grievous) if they are already transported by local people to the nearest hospital before the Railway Doctors had arrived.

F. Officer or Senior Supervisor first reaching the Site:

1. The Officer or the Senior Supervisor first reaching the site of the accident shall check-up:- a) Whether protection has been done. b) On a double line, whether the other line is free from obstruction for moving trains. c) Whether necessary message supposed to be relayed regarding the details of the accident, casualties etc., have already been relayed or not.
2. He shall make a quick assessment of the assistance required and relay the same to the control. He will also marshal all available resources like Guard, TTEs, other Railway employees, volunteers from passengers, escort RPF, etc., and organize rescue and relief of the injured and other passengers.
3. He shall also examine and make a note of all evidence which may prove useful in ascertaining the cause of accident.
4. He shall arrange for protection of the site/area that holds the clues/evidence which will be essential to arrive at the cause of accident. He shall ensure that such clues/evidence is not tampered with by Railway staff or outsiders.
5. The following points require special attention: a) The condition of the track, with special reference to the alignment, gauge, crosslevels, curvature, super elevation and rail headwear: b) Point of mount or point of drop, if any c) The condition of rolling stock with special reference to Brake power. d) Marks on sleepers and rails: e) Position of derailed vehicles; f) The position of Block Instruments, signals, points, levers, indicators, keys; g) If the accident has taken place within station section, the position of switches and indications of the Signals, points and track circuits should be jointly recorded preferably by three officers (or three senior subordinates of Traffic, S&T & Engineering departments) of different branches and the relay room should be sealed as soon as possible. h) Position of important relays and the condition of the block instrument (i.e. whether open or locked) and i) He

- should cross check the list of casualties prepared by the Railway Doctor and countersigned by the civil police (if some bodies are yet to be recovered, it should specifically be mentioned that the list is not final and will be conveyed after salvaging bodies from debris).
6. Where possible a rough sketch showing the position of Derailed vehicles, marks on sleepers etc., should be made.
 7. All relevant materials, clues, damages and deficiencies on the locomotive and rolling stock as well as position of broken or detached parts of Permanent way and rolling stock must be carefully noted and all such clues etc., carefully preserved so that, if considered necessary, the scene could be reconstructed before the police, the Commissioner of Railway Safety or any other senior officer, or court of law.
 8. If, however, sabotage is suspected, in addition to noting and preservation of all such clues, no object should be disturbed unless the police have had an opportunity of making thorough inspection of the site. However, if there is delay in the arrival of Civil and Police officials at the site of the accident, the senior most Railway Official at site may, at his discretion, jack up any portion of a coach or shift any property to the minimum extent necessary, after noting its original position by sketch to extricate human beings trapped under it, in the shortest possible time to save life and minimize sufferings. Normal traffic, however, should not be permitted without consulting the police. a) Further specific enquiry should also be made from the Commissioner of Railway Safety in case of suspected sabotage to ascertain if he would like to inspect the site before the clearance operations commence. b) Restoration / clearance should not commence (except to the minimum extent necessary to save human lives) unless such permission has been received from police authorities as well as CRS.
 9. In the case of serious explosion or fire caused by explosives or dangerous goods, all wreckage and debris must be left untouched, except in so far as its removal may be necessary for the rescue of the trapped / injured persons and recovery of dead bodies, until the Chief Inspector of Explosives or his representative has completed his inquiry or intimated that he does not intend to make any investigation.
 10. If the station staff are prima facie responsible, the train passing records must be seized and statements of station staff concerned recorded.
 11. If a passenger carrying train is involved, the officer or senior subordinate must secure the written evidence of as many witnesses as possible and their names and addresses should be recorded. The witnesses selected should not be railwaymen,
 12. He should have a complete list of names and addresses of the injured and dead along with the addresses of relatives and ensure messages are sent to the relatives of the injured or dead.
 13. He should also ensure that Superintendent of Police and District Magistrate have been advised.
 14. He should give the prima-facie cause of the accident with the expected time of restoration.
 15. He should ensure that progress report is relayed to control every one hour.

9.5 Action Plan for FPI & HORTICULTURE DEPARTMENT

Paschim Medinipur District is rich in Horticultural crops. All types of Horticultural crop are grown in this district. Product of Horticulture is prime source of our food chain and this district produces most of the crops like-Vegetables mainly grown in Garghbeta-I, II & III, Daspur-I & II, Kharagpur-I, Salboni, Keshpur & Keshiary Block, Flowers- mainly grown in Debra, Daspur-I & II, Khargpur-I & II, Sabang, Pingla, Narayangarh, Fruits- mainly grown in Garhbeta-I, Garhbeta-II, Garhbeta-III, Kharagpur-II etc. Spices- most of the block of this district, Cashewnut in Garghbeta-I, II & III, Salboni etc.

Paschim Medinipur District ranks 1st position in Cashewnut Production in this state. Betel vine is another economical crop in this district.

Vegetables and Flowers are remunerative crop and cultivation of these crops helps up-liftment of economic status in a short period. So, Horticultural planning is made in such a way by which the adversed situation affected by flood and drought can be combated.

To overcome the adverse effect of Flood:

1. Seed showing of leafy vegetable for immediate harvesting like- Amaranthus, Palak, Radish, coriander, Methi etc.
2. Other short duration direct showing crops like Cowpea, Ridge Gourd, Pumpkin, Cucumber, Bottle Gourd etc. are suitable after flood.
3. In heavy flood affected saline area Beet Root, Ridge Gourd and Beans crops are suitable for cultivation.
4. After flood clay deposited soil are suitable for vegetable cultivation and deposited sand will be removed by means of manually or mechanically.

To overcome the adverse effect of Drought:

1. Digging of water Harvesting Structure like Ponds, Tube well and other irrigation sources.
2. Inspiring for installation of drip irrigation for all horticultural crops.
3. Plantation of Dry land Horticultural Crop like-Cashew, Ber etc.
4. Providing mulching to the base of the crop by means of organic or inorganic.

Action to be taken by the farmers in Flood:

1. Crops are grown in furrow and ridge bed method.
2. Well drainage system throughout the plot.
3. Seedling production in raise bed protected by polythene for rain water.
4. After flood immediate application of fungicide to the crop.
5. Seeds are sowing in line in nursery and maintain proper spacing to avoid rotting of the crop.
6. In saline belt only use saline resistant crop like-Beet Root, Ridge gourd, Beans, Cowpea etc.

Action to be taken by the farmers in Drought:

1. Planning for less water requirement crop.
2. Planting of crop with enough organic matter with poly mulching.
3. Sprinkler or Drip irrigation method is most suitable for drought prone area.
4. In drought prone area shade nets are beneficial for vegetable and flower production.

Measure to be taken by F.P.I. & Horticulture Department in Flood:**1. Distribution of Vegetable Seed Kit:****KIT-I:**

SL No.	Name of the Vegetable Seeds	Quantity
1	Amaranthus	100g
2	Beans	500 g
3	Brinjal	10 g
4	Beet	250g
5	Knolkhol	50 g
6	Carbendazim	250 g
7	Neem based Insecticide	250 ml

KIT-II:

SL No.	Name of the Vegetable Seeds	Quantity
1	Coriander	100g
2	Carrot	50 g
3	Brinjal	10 g
4	Radish	50g
5	Okra	100 g
6	Carbendazim	250 g
7	Neem based Insecticide	250 g

2. Distribution of Flower Kit:**KIT-III:**

SL No.	Name of the Ingredient	Quantity
1	Neem Cake	10 kg
2	Difenokonazole+ Azoxystrobin	100 ml
3	Biological Insecticide	1 kit

3. Distribution of Betel vine Kit:**KIT-IV:**

SL No.	Name of the Ingredient	Quantity
1	Neem Cake	10 kg
2	Carbendazim + Mancozeb	250 g
3	Neem based Insecticide	250 ml

Total nos. kit:

SL No.	Name of crop	Quantity
1	Vegetable	35,000 nos. kit
2	Flower	8,000 nos. kit
3	Betel vine	3,000 nos. kit

 - ii) The maximum post of Livestock Dev. Assistant (the GP level employee), UDC, LDC, Vety. Field Supervisor & Vety. Pharmacist under Block Livestock Dev. Officer are lying vacant

9.9 Action Plan for AGRICULTURE DEPARTMENT

Paschim Medinipur District is located in the southern part of West Bengal between 22°57'10" and 21°36'35" North latitude and between 88°12'40" and 86°33'50" East longitude. The geographical area of the District is 611694 ha. It is bounded by Bankura District in Northern side; Hooghly and Howrah in the North-Eastern side, Purba Medinipur District in the Eastern & South-Eastern side, and newly emerged Jhargram District in the Western and Southern side.

The District comprises of 3 Sub-divisions – Medinipur Sadar (6 Blocks), Kharagpur (10 Blocks), & Ghatal (5 Blocks). More than 75 % of the total population lives in rural areas of the District & Economy depends on Integrated Agriculture & small scale industries.

The District possesses diversified ecosystem having different vegetation, Soil types, Climatology & Geomorphology. The important rivers like the Kangsabati, the Silabati, the Subarnarekha, the Dulang, the Tamal, the Darakeswar the Keleghai & their tributaries flow through the District & enrich the cropping system by depositing fertile loam or sandy loam Soil during rainy season.

The major crops grown in the District are Aus, Aman & Boro paddy, Wheat, Potato, Mustard, Til, Groundnut, Vegetables, Pulses, Watermelon, Maize, Sugarcane, Jute, Betel leaves & Matstick etc.

Net cropped area of the District is about 426760 ha. Gross cropped area 825871 ha having 193.52 % cropping intensity. The District faces heavy rainfall, hailstorm, both flood & drought and sometimes one is followed by another in a same year. Ghatal and part of Kharagpur sub-division have flood prone areas of about 142647 ha. As well as Medinipur Sadar sub-division and part of Kharagpur sub-division have drought prone area of about 107093 ha. The Long Term Average rainfall of last 31 years is 1525.1 mm but it is the experience of the people that the District faces scattered & uneven distribution of rainfall almost in every year & the monsoon showers come always in late.

Disaster Management is a strategy which is implemented when any types of catastrophic event takes place. The Disaster Management plans in Agricultural sector means the contingent crop planning in Kharif crops during Kharif season to meet the unforeseen contingencies like flood, drought etc. during the growing season of crops.

Agriculture largely depends on nature & contingent crop planning is an integral part of agricultural production planning. The objective of the contingency crop planning is to provide ways & means to tackle the situation due to flood or drought or any other natural calamity.

To combat the situation whatever it may arise due to flood or drought the following action plan is to be adopted:

To overcome the adverse effect of Flood

Actions to be taken by farmers:

1. Staggered sowing of paddy seed in seed bed at 10 days interval.
2. A place of higher elevation to be chosen for raised seed bed.
3. To reduce the detrimental effect of sand deposition in cultivated land, sufficient organic matter is to be applied.
4. If sand deposition is high, it is to be removed manually or mechanically.
5. Where there is no time for rice cultivation-
 - a) Kalai (Variety-Sarada, Goutam, Sulata etc.) may be grown in the post-Kharif season.
 - b) Toria, yellow sarson, lentil, gram, mustard & sunflower etc. may be grown early in the Rabi season.

To overcome the adverse effect of Drought

A. Actions to be taken by the departmental officers –

- a) Joint monitoring by District level officers of the department of Agriculture, Irrigation & Waterways and WRI&D to be done to look into the real situation and to find out the ways for supplying Irrigation water from all Irrigation sources and ensuring it at grass root level in the blocks.
- b) Water harvesting structures like pond, dugwell etc. to be excavated for storing rain water by various departments.

B. Actions to be taken by the farmers:

- a) For harvesting rain or runoff water, earthen bunds are to be constructed around the individual plot.
- b) Application of organic manure to increase the water holding capacity of the soil.
- c) Community nursery seed bed of rice is to be done near a water source at least a month before normal seed bed preparation.
- d) Staggered sowing of rice seed in seed bed at 10 days interval.
- e) Closer spacing with higher number of seedlings per hill are to be practiced.
- f) Direct seeding of rice through zero/minimal tillage machine.
- g) Cultivation of arhar, blackgram, groundnut & maize or mixed cropping of maize & arhar in high lands.
- h) Mechanical weeding in rice field & use the uprooted biomass of weeds as soil mulch or use other mulching materials like straw in rice field.
- i) Not to apply Nitrogenous fertilizer in the soil to restrict weed growth. Foliar spray of Urea or DAP @ 1-2% may be applied at critical growth stages of the crop.

Measures to be taken by the Agriculture department through Govt. schemes:

A. Paddy minikit – short to medium duration paddy varieties are to be distributed with free of cost.

1. Aman Paddy minikit – 200000 nos. at 10kg-----4000 ha area under seed bed/ 40000 ha area under transplanting.
2. Boro paddy minikit – 200000 nos at 10kg-----4000 ha area under seed bed/ 40000 ha area under transplanting.

B. Fertiliser minikit:

1. For Aman paddy minikit – 200000 nos. at 10kg NPK 10:26:26
2. For Boro paddy minikit - 200000 nos. at 10kg NPK 10:26:26

C. Seed treating chemical(Like Bavistin/Tricyclazole/Mancozeb etc. fungicide)

1. For Aman Season – 200000 nos. chemical kit at 100gm.
2. For Boroseason - 200000 nos.chemical kit at 100gm.

D. Insecticide to control pest:

1. For Aman Season – 200000 nos. chemical kit at 100gm. Or 100ml
2. For Boro season - 200000 nos.chemical kit at 100gm. Or 100ml

E. Growth regulator:

200000 unit - n-Tricentanol at 100ml. each. - 40000ha

F. Paddy Seed bed to be grown in Govt. Farms (Kharif) that are to be distributed free of cost in case of natural disaster.

Sl. No.	Name of Farm	Area under seed bed(acre)
1	DSF, Midnapore	1
2	JSMF, Goaltore	1
3	SARF, Garhbeta-II	1
4	BSF, Garhbeta-I	1
5	BSF, Keshpur	1
6	SARF, Khirpai	1
7	SARF, Pingla	1
8	BSF, Sabang	1
9	JMF, Keshiary	1
10	BSF, Narayangarh	1
District Total		10

G. Motivation of growing additional seed bed in different blocks (if needed for weather abnormalities)

Sl. No	Name of Blocks	Number of farmers to be motivated	Additional area under seedbed (dec.) at 10dec. per farmer	Transplanted area to be covered (ha.)
1	Medinipur Sadar	500	5000	200
2	Salboni	500	5000	200
3	Keshpur	500	5000	200
4	Garhbet -I	500	5000	200
5	Garhbeta-II	500	5000	200
6	Garhbeta-III	500	5000	200
7	Kharagpur-I	500	5000	200
8	Kharagpur-II	500	5000	200
9	Sabang	500	5000	200
10	Pingla	500	5000	200
11	Debra	500	5000	200
12	Narayangarh	500	5000	200
13	Dantan-I	500	5000	200
14	Dantan-II	500	5000	200

15	Mohanpur	500	5000	200
16	Keshiary	500	5000	200
17	Ghatal	500	5000	200
18	Chandrakona-I	500	5000	200
19	Chandrakona-II	500	5000	200
20	Daspur-I	500	5000	200
21	Daspur-II	500	5000	200
District Total		10500	10500	4200

H. Storing of paddy straw in different Govt. Farms for cattlefeed

Sl. No.	Name of Farm	Total quantity of paddy straw (Qtl.)
1	DSF, Midnapore	10
2	JSMF, Goaltore	10
3	SARF, Garhbeta-II	10
4	BSF, Garhbeta-I	10
5	BSF, Keshpur	10
6	SARF, Khirpai	10
7	SARF, Pingla	10
8	BSF, Sabang	10
9	JMF, Keshiary	10
10	BSF, Narayangarh	10
District Total		100

I. Other seed kits to be distributed under natural disaster

Sl. No.	Name of seed kit	Nos.	Area covered (ha.)
1	Mustard	100000 at 1kg each	14000
2	Khesari	50000 at 4kg each	6500
3	Lentil	3000 at 4kg each	1200
4	Wheat	30000 at 4kg each	4000
5	Ground nut	30000 at 15kg each	4500
6	Potato	200000 at 50kg each	4000
7	Maize	30000 at 4kg each	6000
8	Moong	30000 at 4kg each	4000
9	Kalai	30000 at 4kg each	4000
10	Til	100000 at 1kg each	14000

This is in short the contingency crop planning which will be adopted during the year 2019

We do expect that the department of Agriculture, Govt. of West Bengal will be in a position to tackle the situation arises due to natural disaster in the District.

9.10 Action Plan for AGRI-MECHANICAL DIVISION:

Midnapore (Agri- Mech) division, Paschim Medinipur is looking after the running and maintenance of 284 nos. Govt. owned and operated River Lift Irrigation Schemes and 169 nos. of Handed over River Lift Irrigation (RLI) Schemes. Out of these 284nos. R.L.I Schemes, 84nos. are electrically operated and the remaining 200 nos. R.L.I Schemes are diesel operated. The Total cultivable command area of all these R.L.I Schemes is to the tune of 26,000 Ha (approximately) and the potential created due to installation of these schemes is approximately 60,000 Ha yearly.

As the discharge capacity of the diesel pump sets is reduced from the rated capacity due to their (20-25 years) ages resulting in less coverage of irrigation by the old and inefficient diesel pumping sets, the WRID Department started to convert all the diesel operated RLI Schemes to the electrically operated one. The proposed conversion/renovation of 1 no such diesel operated R.L.I Schemes will create an opportunity to bring back nearly 100-120% of the cultivable command area under assured irrigation. The conversion will facilitate easier operation and maintenance of the pumping sets, and will have beneficial effect on the environment besides avoidance of the hazards involved in the carriage & storage of highly inflammable H.S.D and lube oil required for the operation of diesel engine pumping sets.

Existing Structures: - RLI Structures (Govt Owned) are as follows:-

Sl. No.	Type of structure	Nos.	Name of Block	CCA in Ha	Remarks
1	Major RLI	21	Midnapore Sadar	1260	
2	Major RLI	7	Salboni	420	
3	Major RLI	8	Garbeta-I	480	
4	Major RLI	5	Garbeta-II	300	
5	Major RLI	3	Garbeta-III	180	
6	Major RLI	17	Keshpur	1020	
7	Major RLI	16	Debra	960	
8	Major RLI	7	Khargpur-I	420	
9	Major RLI	7	Kharagpur-II	420	
10	Major RLI	7	Keshiary	420	
11	Major RLI	10	Narayangarh	600	
12	Major RLI	9	Sabong	540	
13	Major RLI	7	Dantan-I	420	

RLI Structures (Handed Over) are as follows:-

Sl.No.	Type of structure	Nos.			Name of Block	CCA in Ha	Remarks
		Major	Midi	Mini			
1	RLI	9	6	4	Midnapur Sadar	860	
2	RLI	9	1	1	Keshpur	600	
3	RLI	4	2	0	Garbeta-1	320	
4	RLI	4	0	0	Garbeta-II	240	
5	RLI	2	0	0	Garhbeta- III	120	
6	RLI	12	1	0	Debra	760	
7	RLI	8	3	0	Salboni	600	
8	RLI	3	0	1	Kharagpur-I	200	
9	RLI	4	1	0	Kharagpur-II	280	
10	RLI	3	0	1	Narayangarh	200	
11	RLI	0	2	12	Sabong	280	
12	RLI	3	0	0	Keshiary	180	
13	RLI	1	3	3	Dantan-I	240	

Ongoing Schemes:-

Sl.No.	Type of structure	Nos.			Name of Block	CCA in Ha	Remarks
		Major	Midi	Mini			
1	RLI	91	36	9	Different blocks of Paschim Midnapore except Ghatal S/Divn	7080	

Plan for Management:-

1) As all the RLI Schemes (Govt. Owned) are operated by the Operator cum Mechanic (OCM)/Assistant Operator (A.O.) who are posted in the above noted blocks under the BDOs of the District can be utilized for any disaster like situation.

2) The 4 nos. Assistant Engineer (AM)/ (AE) of 4 nos. Sub Division and the Executive Engineer (AM) Midnapore (AM) Division can be contacted for the disaster management. Their Phone Nos. are as follows:-

Designation	Phone nos.
Assistant Engineer(AM) Jhargram-I(AM) Sub Division	03221 255163
Assistant Engineer(AM) Jhargram-II(AM) Sub Division	03221 255163
Assistant Engineer(AM) Midnapore (AM) Sub Division	03222 275579
Assistant Engineer(AE) KharagpurI(AE) Sub Division	03221 275579
Executive Engineer(AM) Midnapore (AM) Division	03222 275765 / (M) 9830220128

9.11 Action Plan for AGRI-IRRIGATION

Minor Irrigation plays a vital role in the agricultural development of the state. Both surfaces as well as ground water are being harnessed for implementation of M.I.Schemes in various parts of state. However, surface water is more significant in those parts where ground water availability is less favourable.

A considerable number of Tube Well and surface flow irrigation schemes are in operation under Midnapore (A-I) division of water Resources Development Directorate. There are three sub-divisions under the division covering 16 (Sixteen) no. of blocks of Paschim Medinipur District. The Sub-divisional offices are located in Midnapore and Belda.

Location of sub-Division offices:

- Office of the Assistant Engineer (A-I) Midnapore (A-I) sub-division, Narampur (Near District Jugges' Court), Post- Midnapore and Distt. Paschim Medinipur ph. No. 275465.
- Office of the Assistant Engineer (A-I) Belda (A-I) Sub-division, Belda, Post- Belda, Dist. – Paschim Medinipur. Ph. No.03229-255264.

Designation	Contact details
Excutive Engineer, Agri-Irrigation, Paschim Medinipur	8584807922, 9434455373 03222-275465
Asstt. Engineer, Belda (A-I) Sub-division	03229-255264
Asstt. Engineer Midnapore (A-I) sub-division (officiating)	03222-275465

Measures to be taken for prevention of damages in Minor Irrigation Installations:-

- Since most of the schemes are electrically operated, during pre-monsoon cyclone etc. necessary alertness to be ensured for causing temporary disconnection of power supply to the schemes to prevent loss of life by electrical short circuit etc.

2. Pre-Monsoon cyclonic damages of command area should also be prevented which may ultimately cause damages to different spout chamber, Distribution chamber, existing Pipe line etc.

Details of Schemes:

Annexure-A

Vulnerable Zones under Irrigation and Waterways Department of Paschim Medinipur

The embankments under this Division have been severely damaged on flood 2017 on the river Cossyed for left and right embankments. Left embankment of Cossye near Balipata, (Ch. 14.45 to 16.988) Km. raising and strengthening work required. Estimate has been done and submitted. One sluice at Balipata is required to control the flow water from land field area. Resection of Kalichandi Khal from Alahiganj to Cossye River is required to discharge heavy flood water. A detailed report for the above will be sent shortly for your information and alarming the peoples from administration levels. Several numbers of rain cuts, vertical slips and damage of inspection path has been observed over the embankments of TE1H1 from 15.20 Km. to 40.00 Km. & TE2H2 from 0.00 Km. to 14.00 Km. and TH3H2 from 14.00 Km. to 26.00 Km. All repairing works are taken up and will be completed before monsoon.

Under Ghatal Sub-Division, some portion of the embankment of C.C., D.C & M.C have been damaged during flood during 2017 as per available fund repair work have been taken up on emergency basis. Vulnerable points in Ghatal (I) Sub-Division are Harispur, Ajuria, Kalmijore, and Khukrdaha-Majipara.

VULNERABLE ZONES UNDER GHATAL (I) SUB-DIVISION UNDER WEST MIDNAPORE DIVISION

Vulnerable Zone under DUSSASPUR - I Section

Sl No.	Location & Mouza	Chainage	River	Nature of damaged	Name of Embankment
1	Kalorah Steel Bridge / Daspur- I / Paschim Medinipur	46.00 Km to 50.00 Km	Old Cossye	Tendency to further scour	Chetua Circuit Embankment

Annexure-C

1. Major Disaster faced by this District in 2019-2020 are a Cyclonic Storm “FANI” on 04th May 2019 and a Severe Cyclonic Storm “BULBUL” on 8th November 2019.

A Severe Cyclonic Storm “BULBUL”	
House Building Grant	Rs. 1,30,75,100/-
Contingency	Rs. 18,00,000/-
Agriculture	Rs. 195608.35/- Lakh
Paan Boroj	Rs. 4,45,90,000/-

A Cyclonic Storm “FANI”	
House Building Grant	Rs. 1,29,21,000/-
Contingency	Rs. 10,00,000/-

2. The Plan of Mock drill and training to be incurred with details of financial estimation are appended below:

Per Programme cost in Rs.	No of Sub-Division / Block	No of Programme to be held at each SD/Block	Total Numbers of Programme	Tentative Cost (Approx.) in Rs.
20,000/-	3 Sub-Division	3	9	18,0000/-
20,000/-	21 Blocks	3	63	12,60,000/-
Total No of Programme:			72	12,78,000/-

Therefore, total no of Mock Drill and Training will be held at this District is 72 Nos and an estimation of Rs. 12, 78,000/- (Rupees Twelve Lakh seventy Eight thousand) only/- may be required for the same purpose.

3. The Plan for procurement of Machinery / Instrument for the next year is appended below for this District:

List of required Equipment's for Search & Rescue, Paschim Medinipur.			
Sl. No.	Name of Equipment	Plan for Procurement	To be kept at
1.	Ascender New Manual peft	1	CD KGP -1
2.	PA Megaphone 20 watts Shoulder Sling Type 3331885 Model-AM 2015 3331887	30	CD KGP = 3 3 SD x 2 = 6 Block = 21
3.	Descender (Figure of 8)	1	CD KGP-1
4.	12 volt Battery for PA Megaphone	32	CD KGP = 3 3 SD x 2 = 6 HQ=2 Block= 21
5.	FRP Industrial Safety Helmet with LED (with visor)	64	CD KGP = 10 3 SD x 3 = 9 HQ = 3 Block 21x2=42

6.	Hand held rechargeable Search Light with 2 chargers	53	CD KGP = 3 3 SD x 2= 6 HQ= 2 Block 21x 2= 42
7.	CBRN Mask with BA Set (Carbon Composite Cylinder)	2	CD KGP = 2
8.	Circular Saw with 1 Diamond Blade & 1 Abrasive Blade	27	CD KGP- 2 3 SD x 1= 3 HQ= 1 Block 21x 1= 21
9.	Spare Abrasive Blade for Circular Saw	2	CD KGP -2
10.	Bullet Chain Saw	32	CD KGP = 3 3 SD x 2= 6 HQ-2 Block 21x1 = 21
11.	Flat -Head Axe	55	CD KGP = 5 3 SD x 2= 6 HQ=2 Block 21 x2= 42
12.	Search CAM	1	CD KGP=1
13.	Rope Launcher	1	CD KGP=1
14.	Breathing apparatus	6	CD KGP = 2 3 SDx1= 3 HQ=1
15.	Portable search light	52	CD KGP = 2 3 SD x 2= 6 HQ=2 Block 21x2 = 42
16.	Light Mast	-	CD KGP=4
17.	Lifebuoy	60	CD KGP = 10 3 SD x 2= 6 HQ=2 Block 21x2 = 42
18.	Generator (Capacity wise)	1 (5kva)	CD KGP=1
19.	Breathing Air Compressor	1	CD KGP=1
20.	Extinguisher (ABC Type)	78	CD KGP = 3 3 SD x 3= 9 HQ=3 Block 21x3 = 63
21.	Rope	80Nos	3 SDx20= 60 HQ=20
22.	Gumboot	155	CD KGP= 30 3 SD x 5= 15 HQ= 5 Block 21x5 = 105
23.	Hale Round File	-	CD KGP=8
24.	Light for (Rescue Van)	-	CD KGP=1
25.	Mike Set	-	CD KGP= 1
26.	Fire Extinguisher Foam type	-	CD KGP=1
27.	Fire Extinguisher Soda Acid	-	CD KGP=1
28.	Fire Extinguisher	-	CD KGP=1
29.	H.F Sets	-	CD KGP= 1
30.	(Portable gen. set & Air Compressor) ASKA Inflatable light	1	CD KGP=1

31.	First Aid Box	78	CD KGP = 3 3 SD x 3= 9 HQ=3 Block 21x3 = 63
32.	Fire Entry Suit	2	CD KGP = 2
33.	Concrete Cutting Saw	26	CD KGP = 1 3 SD x 1= 3 HQ=1 Block 21 x1= 21
34.	Hammer Drill	-	CD KGP
35.	Life Jacket	135	CD KGP = 10 3 SD x 5= 15 HQ=5 Block 21x5=105
36.	Safety Gloves	135	CD KGP = 10 3 SD x 5= 15 HQ=5 Block 21x5=105
37.	Safety Goggles	135	CD KGP = 10 3 SD x 5= 15 HQ=5 Block 21x5=105
