FOREWORD

We can not escape from the fury of natural disasters and manmade disaster as we can not prevent them. There have been plentiful occurrences of disasters throughout the year. Disaster is negatively correlated with development activities as it slows down the process of development.

The Purba Bardhaman district having an area 5163 Sq. K.M. and a population of 48,35,532 as per Census 20011, is one of the largest districts in the state. The district is surrounded in North by Ajoy river, South/South-West by Damador, West-Paschim Bardhaman and East by Bagarathi. It extends from 22°56` to 23°53` North latitude and from 86°48` to 88°25` East longitude.

The calamities in the district vary from eastern to western part. While eastern part faces flood / water logging every year, the western part faces industrial hazards including subsidence etc. There is a long stretch of NH - 2 and rail network traversing through this district. Hence, there always remains possibility of occurrence of road / rail accidents, resulting in human suffering.

There has been a progressive change in the approach, methods and execution of relief operations during before and after natural calamities. Of late, there is a shift in paradigm in the management of flood and disaster from the earlier concept of contingent plan to comprehensive Disaster Risk Management Programme. It is more or less holistic in nature and involves all concerned departments, people's representatives and NGOs.

The Burdwan District successfully implemented DRMP from 2004-2009 in order to reduce the impact of disasters in a convergent and co-ordinated manner. Also the GOI-UNDP Disaster Risk Reduction Programme (DRR) has also been implemented from 2009 to March, 2013 in order to mitigate the risk factor of the disasters.

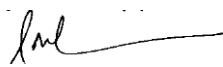

It is also stressed that developmental works of different departments and Panchayat Raj Institutions should converge to fulfill some of the objectives of Disaster Risk Management Programme.

Keeping the aforesaid issues in mind and for implementation of Disaster Management Act 2005, there was a felt need to have a well documented District Disaster Management multi hazards and Response Plan for our district. Relevant details in connection with disaster management exercises have been incorporated in this booklet. The Disaster Management Plan will be the basis to establish policies and procedures for assuring maximum and efficient utilisation of all resources of the District with a view to minimize the loss of property, life and injury to the population.

The District Disaster Management Authority has been constituted in terms of sub-Sec.1 of Section 14 of the Disaster Management Act 2005. The present booklet reflects the activities of the Disaster Management Authority, Purba Bardhaman District in performing functions and achieving objectives as laid down in the Act. No major natural calamity, earthquake, flood etc. were reported in this District in the last years. The Disaster Management Section, however, has undertaken various preparatory measures for tackling situation arising out of anticipated natural disasters. Training of staff, awareness programme at School, Colleges, Gram Sansads, procurement of equipments, imparting specialized skill in respect of deep diving etc. have been undertaken with active assistance Department of Disaster Management & Civil Defence, Howrah.

We hope this booklet will serve as ready reckoner in the event of any disaster for real time communication of vital information in between the affected persons and the rescue, relief providers, District Administration etc. The steps enumerated in the booklet may help in reducing the damages to life and property of the affected population in the event of any disaster.

DISTRICT DISASTER MANAGEMENT PLAN
District : Purba Bardhaman , State : West Bengal

WHY IS IT

Disaster Risk Reduction (DRR) is a systematic approach to identifying, assessing and reducing the risks of disaster. It aims to reduce socio-economic vulnerabilities to disaster as well as dealing with the environmental and other hazards that trigger them to give strength to development.

The most commonly cited definition of DRR is: "The conceptual framework of elements considered with the possibilities to minimize vulnerabilities and disaster risks throughout a society, to avoid (prevention) or to limit (mitigation and preparedness) the adverse impacts of hazards, within the broad context of sustainable development."

OBJECTIVE

- The purpose of this plan is to establish procedures for implementation prior to, during and following a natural or man-made disaster.
- The plan gives primary consideration to required actions necessary to protect the property, human lives and livestock.
- Create in an un-affordability of quality construction.
- To alleviate high damages and losses.
- High demand for infrastructure development.
- Develop more economic activities for creating more employment.

DISTRICT OVERVIEW:

Origin :

The name Burdwan is the anglicized form of Barddhaman. (also spelled as Burdwan or Burdhaman) is a district in West Bengal.

There are two schools of thoughts about the name Barddhaman. It might have been named after the 24th Jaina Tirthankar. According to Kalpasutra of the Jains, Mahavira spent sometime in Astikagram which was formerly known as Barddhaman. According to the second school, Barddhaman means prosperous growth centre. In the progress of Aryanisation from Upper Ganges valley, the frontier colony was called Barddhaman as a landmark of growth and prosperity. The name came to stay as the Aryans failed to consolidate their gains further east.

District : Purba Bardhaman , State : West Bengal

SOCIAL & RESOURCE MAP SHOWING RIVER SYSTEM OF BURDWAN DISTRICT.

The main town of the district is Burdwan, Kalna & Katwa

Geography: Total Geographical Area: **5163.46** sq. km.

The district extends from 22°56' to 23°53' N latitude and from 86°48' to 88°25' E longitudes. Lying within Burdwan Division, the district is bounded on the north by Dumka (of Jharkhand), Birbhum and Murshidabad, on the east by Nadia, on the south by Hooghly, Bankura and Purulia and on the west by Dhanbad (of Jharkhand) districts.

The river Barakar forms the State boundary to the west; the Ajay separates Birbhum and Dumka to the north with exception of a portion of Katwa subdivision; the Damodar forms a southern boundary with Purulia and Bankura, while Bhagirathi forms the main eastern boundary with a few exceptions. The maximum length from east to west is 208 Km while the maximum breadth from north to south is 112 KM. In shape the district resembles a hammer.

The district with its varied tectonic and riverine features is a transitional zone between Chotanagpur Plateau and the Gangetic alluvium. As per classification made under NARP, West Bengal has been classified under six zones. District Burdwan having diversified features, falls under three zones, namely old alluvial zone, new alluvial zone and red and laterite soil zone. The KVK (Krishi Vigyan Kendra) farm at Bud Bud , however, falls under old alluvial zone.

RIVERS :

The river system in Bardhaman includes the Bhagirathi-Hooghly in the east, the Ajoy and its tributaries in the north and the Dwarakeswar, the Damodar and its branches in the south-west. Besides, there are innumerable Khals and old river beds all over the area.

The notable rivers and khals are Damodar, Bhagirathi, Barakar, Ajoy, Dwarakeswar, Nonia, Singaram, Tamla, Kukua, Kunur, Tumuni, Khari, Banka, Chanda-kanki nala, Behula, Gangur, Brahmani, Khandesvari, Karulia nala, Dwaraka or Babla, Koiya nala, Kandarkahal, Kanadamodar, Kananadi, Ghea, Kakinadi etc.

MINERALS :

Bardhaman is one of the premier districts in India in terms of value of mineral. The Raniganj coalfield was the birth place of the Indian coal industry. Besides coal, important minerals found in the district are iron ores, calcium carbonate, abrasives, silica bricks and mounding sands, glass sands, building materials, Manganese, Bauxite, laterite etc.

WATER RESOURCES :

There are many tanks, wells, canals, swamps and bils are found all over the district. Within the Damodar Valley region, there are around 17000 tanks. The Durgapur barrage and Mithon dam have formed two large reservoirs at the south-western and western periphery of the district.

FOREST :

The forest areas of the district are chiefly situated in the lateritic and red soil high lands in the Aushgram PS of Sadar Subdivision and in the Asansol subdivision. In Ausgram P.S. the forest areas are interspersed with paddy fields. The Durgapur forests are continued in the Birbhum district beyond the Ajoy while the forest area in the Asansol subdivision forms a part of the forest area of Dumka District of Jharkhand.

FISHES :

Of the rivers and rivulets which pass through the district of Bardhaman, the Ganges (Bhagirathi), the Damodar, the Banka, the Ajoy and the Khari constitute the fisheries of some importance. Out of these rivers, only the Ganges maintains the flow of water throughout the year. The flow of Damodar depends entirely upon the discharge of water by DVC from its barrages. The other rivers practically dry up in hot months when fishes accumulate in depressions here and there to catch indiscriminately by the fisherman.

CLIMATE :

The district experiences a climate which is : Average temperature in hot season is 30°C while at the cold season is 20°C. And average annual rainfall is 1500 millimeter .

The cold season starts from about the middle of November and continues till the end of February. March to May is dry summer intervened by tropical cyclones and storms which although infrequent are notable features of the weather and climate of this district. June to September is wet summer while October and November is autumn.

AGRICULTURE :

Burdwan is the only district in the state of West Bengal that is fortunate both in industry and agriculture. On an average about 58 percent of the total population belongs to the agricultural population while the non-agricultural sector accounts for the remaining 42 percent.

The eastern, northern, southern and central areas of the district are extensively cultivated but the soils of the western portion being extreme lateritic type are unfit for cultivation except in the narrow valleys and depressions having rich soil. Rice is the most important crop of the district. Paddy covers maximum of the gross cropped area. Among commercial crops, jute, sugarcane, potato and oilseeds are major crops. Productivity of the major crops grown in the district is indicated below. Major cropping patterns include paddy-wheat-vegetables, paddy – potato – sesame, paddy – vegetable – mustard and jute – paddy – vegetables.

Due to climate condition, geographical location and industrial belt areas Burdwan district faces various disaster throughout the year. The major thrust is being given on 'flood' as it causes maximum damage and loss of property and human lives. Some cases of Arsenic hazard are being studied by the Public Health Engineering Department. The cases of mining disaster are not unknown. The areas of Raniganj, Andal, Pandabeswar, Salanpur Blocks and the surrounding have been vulnerable for such hazards. The industrial

area of the district, Durgapur, is highly vulnerable to chemical disaster like gas leakage, pollution hazard due to drainage of chemical waste etc.

History Of Disaster and Probability of Disaster episodes in the District

Year	Nature of Flood
1913	Flood of 1913 was called in local language as "Bish Saler Ban" as it was 1320 Banngali Year. Flood occurred at the end of August. At the first stage of flood communications from Calcutta to Burdwan were completely disrupted. Thousands of dwelling houses, lakhs of cattle, hundreds of children, aged men and woman were washed away by the flood. Raina & Khandaghosh Blocks areas were badly affected.
1935	Flood of 1935 was called as "Biyalliser Ban". Coalmine areas of Raniganj and Madanpura areas of Andal were affected by the flood. Famine situation was experienced after the flood.
1943	Rail track near Saktigarh was damaged and G.T. Road was destructed by the flood, which shattered the communication from Calcutta to Northern India. Water passing culvert near Saktigarh was built during the year to avoid the damage of rail track. Immediately after the flood, the English Ruler alerted for flood control.
1978	In the month of August 1978, heavy rainfall occurred by dint of low pressure. Embankment of barrage was damaged by the pressure of barrage water due to heavy rainfall. Areas of Durgapur, Coalmine areas of Raniganj and industrial belt of Andal were badly affected. Vast areas of Katwa, Kalna, and Sadar (North/South) sub-divisions were affected by the flood.
1986	Some Blocks were affected by the flood in the year 1986.
1995	All the Blocks and Municipalities of Katwa sub-division, Kalna-I. Purbasthali-I, Purbasthali –II Blocks & Kalna sub-division, Ausgram-II Block in Sadar (North) sub-division, Jamalpur Block in Sadar (South) Sub-Division, Kanska in Durgapur Sub-Division were seriously affected by the Flood of 1995.
2000	During Flood 2000, 20 Blocks out of 31 were affected in the district. A large number of people were distressed, crops damaged. There were losses of livestock and human lives also.
2009	On 25 th May'09 a cyclonic storm 'Aila' passed over the district. Almost all the Blokcs were affected. 1 (one) person died due to fall of tree. 5514 nos of dwelling houses were damaged fully and 22337 nos of houses were damaged partly.
2015	In the month of July & August, 2015, 30 Blocks , 7 Municipality, 206 GP & 1815 Mouza were affected in the district due to Flood. A large numbers of people were distressed, crops, house, road, embankment, Electricity, fishery & livestock damaged. During flood 42 person died due to drowning, lightning & snake bite.
2017	In the month of July & August, 2017, due to heavy rainfall & water discharge form Durgapur barrage Raina-II & Jamalpur Block were affected.

Mainstreaming Disaster Risk Reduction into Developmental Process

Concept on Mainstreaming:

Disaster impacts considerably all the sectors of development and thus results in a serious social and economic setback to the development. On the other hand, the process of development, and the kind of development choices made in many areas, sometimes creates disaster risks. The intricate relationship between disaster and development is outlined in the following Table.

	Economic Development	Social Development
Disaster limits development	Destruction of fixed assets. Loss of production capacity, market access or material inputs. Damage to transport, Communications or energy infrastructure. Erosion of livelihoods, savings and physical capital.	Destruction of health or education infrastructure and personnel. Death, disablement or migration of key social actors leading to an erosion of social capital.
Development causes disaster risk	Unsustainable development practices that create wealth for some at the expense of unsafe working or living conditions for others or degrade the environment.	Development paths generating cultural norms that promote social isolation or political exclusion
Development Reduces disaster risk	Access to adequate drinking water, food, waste management and a secure dwelling increases people's resiliency. Trade and technology can reduce poverty. Investing in financial mechanisms and social security can cushion against vulnerability.	Building community cohesion, Recognizing excluded individuals or social groups (such as women), and providing opportunities for greater involvement in decision-making, enhanced educational and health capacity increases resiliency.

Further, mainstreaming is a cross-cutting issue which requires political commitment, public understanding, scientific knowledge and know-how, responsible risk sensitive development planning and practice, a people-centred early warning system and disaster response mechanisms. In addition, safeguarding human rights and integrating gender concerns are central to achieving mainstreaming concepts at the local level.

Flood occur in this block owing to:-

- 1) Rise in water level of river Behula and there by over flooding lowlying area of Anukhal G.P, Pindira G.P. and Satgachi G.P.
- 2) Rise in water level of Bhagirathi at Jewdhara.
- 3) Rise in water level of Gangur and there by over flooding lowlying area of Bhurkunda under Baradhamas G.P. Pindira and part of Badla G.P.
- 4) Continuous heavy rainfall during the month of August and September when the natural storages are full.

This plan has been prepared in anticipation of mitigation of human misery in the event of any kind of Disaster.

I hope that this plan will be useful to the officials of line department and Panchayat functionaries of Kalna-II Block at the time of crisis during natural calamity or any kind of disasters. It is requested to all concerned to extend their helping hands to hapless and distressed people at the time of needs.

- History of Disaster (Pref. last two Decade)

KETUGRAM-II DEV BLOCK

Identification of Flood Prone areas

- Mougram G.P.:** Mougram G.P. is situated at the extreme north side of Ketugram-II Dev.Block. It contains 10 villages. Out of those villages Bishnupur, Kalyanpur, Mougram villages are situated in the left side of rive Bhagirathi and Raghupur, Char Narayanpur, Narayanpur, Kamalabari Sujapur and Char Sujapur are situated at the right side (East) of rive Bhagirathi. Nutangram village is situated in between Bhagirathi and Babla river. Soil erosion is a continuous problem at the right side of river Bhagirathi. For that cause the entire mouza of Char Narayanpur is now submerged into the river Bhagirathi. In rainy season excess rainfall of upper catchment area rises the highest water level of river Bhagirathi causes flood in this G.P.. Most of the effective people take shelter at Mougram High School and Sujapur F.P. School at that moment. In general, the communication facility of Mougram G.P. is very poor and at the time of flood it is totally collapsed, boat is one and only vehicle for communication. Total animal husbandry and Fishery Projects are totally destroyed due to flood.
- Sitahati G.P.:** 10 nos. villages is situated in Sitahati G.P. In those villages most of the villages are situated at the Bank of river Bhagirathi. In rainy season when the total rainfall increase in upper catchments area then the highest water level of river Bhagirathi automatically increase. At that

same time the highest water level of river Ajoy increase and the excess water submerge the Sitahati G.P.

Near about 18000 people live at present at Sitahati G.P. At the time of flood most of the effected people take shelter at Sitahati High School and Uddharanpur Flood Shelter.

Communication system is totally collapsed in that situation. Boat is the one and only vehicle at that time.

Total animal husbandry and Fishery projects are fully damaged due to flood.

- Nabagaram G.P.: 12 nos. of village is situated in Nabagaram G.P. In these villages Begunkola, Kankurhati and Nabagaram villages are situated at the coast of river of Ajoy and Khanrulia , Ambalgram are situated beside Kandar. In rainy season the highest water level of river Ajoy rises due to heavy rainfall in the upper catchments area, but the river Bhagirathi is not be able to carry this excess water from river Ajoy and pushes back to Ajoy and Kandar, but that time Ajoy and Kandar already carry excess water from upper catchments. So the above mentioned villages are water logged in that situation.

Most of the effected people take shelter at Shibloon High School and Purulia Flood Shelter.

Total animal husbandry and Fishery projects are fully damaged due to flood.

- BILLESWAR G.P.

Gram Panchayat : Billeswar

Total No. of villages: 21 nos.)

Village beside the river Ajoy: Charkhi, Billeswar, Rasui and Teorah

Vulnerable places :

The concrete bridge (Masi Sanko) near naihati on road from Sankhai to Pachundi is very weak. It may be collapsed any time. If such accident happens the communication will stop. (The bridge repairing is needed.)

There is a low land between Sitahati & Gangatikuri GP on the road from Sankhai to Pachundi. If the Candor overflows the water passes through this low land of the road. As a result the bus communication will be stopped.

Alternate route structure :

Sl. No.	Vulnerable Area in connection with Flood/Water Logging.	Main route	Alternate route
1.	Billeswar, Rasui, Charkhi, Khenaibanda Taipur, etc. in Billeswar GP.	Charkhi to Billeswar Village Road (on Ex-Zamindary Bundh on River Ajay))	Bhulkuri to Billeswar Village Road & PMGSY Road
2.	Uddharan Pur, Naihati, Sitahati, Naliapur, Siluri, Keuguri in	Uddharapur to Naihati PWD Road & Naihati to Keuguri	Gangatikuri to Keuguri PMGSY Road

	Sitahati GP area	NABARD Road	
3.	Bishnupur, Kalyanpur Mougram, Ratanpur etc. in Mougram GP area	Uddharanpur to Kalyanpur Village Road (on the embankment of River Bhagirathi)	Gangatikuri to Mougram PMGSY Road

N. B. : Areas in Raghupur, Narayanpur, Kamalabari, Sujapur, Charsujapur & Natungram becomes inaccessible by road during flood. Only waterways on river Babla and Bhagirathi are used.
